This is a result of the raid of July 3. When the sheriff and deputies raided Roseburg's nine soft drink stands and seized kegs of beer from each. TUBERCULOSIS EXHIBIT ON Warfare on "White Plague" Subject of 7-Day Meeting.

Salem.—An exhibition which is attracting wide attention here opened Friday for the first time on the Pacific coast, the National Association for the Study and Prevention of Tuberculosis opened with meetings and the exhibits at the armory. The exhibit is supplemented by addresses. Further meetings of this character will mark the seven days' program which has been arranged.

W. L. Coper, of New York, is in charge of the exhibit which is being held under the auspices of the Salem citizens' committee. The exhibit is absolutely gratuitous in every way and its sole object is to advance the warfare which is being waged against the "white plague."

Mr. Coper says he hopes to hold an exhibit of this character in Portland, but how soon arrangements may be made is still uncertain.

The tuberculosis exhibit itself is attracting a great deal of attention. Models, maps, charts and many other features illustrative of tuberculosis, its cause, effect and disastrous results from the disease are included in the exhibit.

Marshfield.—The government dredge Oregon is to be taken from Coos Bay to Gray's Harbor as soon as the government project in this harbor is completed which will be some time in September. Portland.—A modern plant containing eight buildings, with an aggregate floor space of more than 400,000 square feet, will be established at the new town of Armstrong, 28 miles south of the city on the Oregon Electric by the Armstrong Manufacturing company. The plant will cost \$151,000.

The company will manufacture 46 different types of machines for use in lumbering and various branches of the industry. The special machinery to be turned out will be used in sawmills, box factories, furniture factories, pulp mills, woodenware shops and pattern shops.

The company has operated an experimental plant in Portland the past six years and during that time has turned out special types of machinery that are now used in 14 countries of the world.

It is planned to begin construction on the plant in about 60 days. When in full operation the plant will give employment to about 300 men.
