

GRACEFUL SPRING GARMENTS WITH NOVEL DRAPED EFFECTS

TWO NEW AFTERNOON GOWNS.

TWO graceful specimens of draped garments are shown here. The one to the right is an afternoon gown of lansdowne, with embroidered collar and cuffs. The other gown has a red moire coat, very military in style, and with the waist finished with a soft satin sash the ends of which are adorned with a deep silk fringe. The coat is worn over a draped skirt of charmeuse satin. The hats are identical in style and have the straw brim with the satin crown and upright plume.

MODISH SUNSHADES.

Fashion Demands That They Should Match the Hat.

The parasol is to be the thing to add chic to the summer costume. Fashion requires that it should match the millinery. Novel handles are in vogue, and many of them are unusually long. The four parasols shown here are typical of the plainer models. The upper one is of American Beauty flowered silk. The second one, which is known as the hat parasol, is of plain blue. This parasol has a novel turned up effect around the edge. The third one is of blue and white checked silk with a plain band around the outside. The fourth is of green silk covered with ruffles.

Many of the shapes have shirred edges, and others which are plain

FOUR NEW SUNSHADES.

have applied shirtings and platings. Stripes are used in every way imaginable and in both narrow and broad effects, being particularly pretty with combination of Dresden silk.

Straight handles seem to be the order of the day, and the carved wood effects predominate.

Bulgarian borders are to be fashionable, and generally speaking it will be a season of gay colors in the parasols. Purple, bright blue, emerald green and various shades of red will be used without pretense of lace or net covering.

Along with the Japanese influence in dress we are not surprised to note the numerous quaint effects in Japanese parasols. The many ribs and blunt finish in place of the slender point through the top are odd, though pleasing. Every color and combination of colors has been used in these styles, but they are most promising in the plain colors with flowered borders or in the all flowered silk effects.

MILLINERY HINTS.

Small Hats With Brims Are the Fashion This Season.

The feature of the season in millinery is the presence of the brim, which has appeared and disappeared like a jack rabbit in the brush. For years we have been wearing all kinds of turbans and caps that had only crowns and were made to fit on the head by reason of an inner crown that held them up.

If you will notice hats closely now you will see that the shapes are really smaller than they have been for decades. This does not appear to the casual observer, who feels that hats

THE FLOWER TRIMMED MODEL.

have been small for years and that the change, if any, is slight. The truth is that up until now the brimless hats were really very large in size and had to be padded or supported by a separate coronet to keep them from falling down over the nose. It is claimed by the designers that the fashion for small hats which fit the head and do not merely rest on it is due to the constant use of the motorcar by a large number of women. In Europe, where taxis are so cheap, it is not a luxury for women to ride to and fro on their daily errands. In America, where taxis are dearer than any other place in the world for some unknown reason, the mass of women cannot afford to ride, but they take their cue in fashion from those who do.

As soon as the comfort of the tiny hat was discovered women adopted it with enthusiasm. It has its defects for it is too often chosen in its most abbreviated shapes by the woman who can least afford to wear it. A tiny, jaunty hat is not intended for the woman with a large, serious face or one who does not fix her hair to fit the hat.

There are elements of comedy in a small hat as there never could be in a large hat. So beware! As the season advances one sees evidences of the larger hat bedecked with flowers. The shape pictured is in this class carried out in mahogany colored braid with a simple wreath of big ox eye daisies as the only trimming. If one omits the streamer of black velvet that hangs at the back of the upturned brim.

Upstairs and Down.

A tailor suggests whisking a black skirt with strong coffee and ammonia to remove dirt. The skirt is first brushed. Then a fresh whisk is dipped into a cupful of strong coffee mixed with a teaspoonful of ammonia, and with this the skirt is brushed. The coffee should be brushed over the skirt quickly, and the brush should not hold too much of the liquid.

Ammonia, alcohol and water in equal parts form a good solution for cleaning skirts. Ammonia, of course, must be carefully used, as it damages some colors. It can be sparingly tried on an inside seam or even on a little stretch of the wrong side of the hem. If it takes out the color alcohol and water can be used instead. Naphtha is objectionable because of its clinging odor and also because a skirt cleaned with it cannot be ironed safely for many hours.

When a skirt of black or other dark colored material looks shiny from much wear it can be rubbed with a solution of borax and water. This solution removes the glaze completely and can be applied whenever the shine returns. Borax, of course, might, like ammonia, have a disastrous effect on some colors, so it, too, should be tried first on the wrong side of the skirt.

Substitute For Grab Bag.

Newer than the grab bag, usually a feature of children's parties, is the huge teapot of heavy earthenware imitating old Canton porcelain. The pot, several sizes larger than the kitchen stove's hot water kettle, has a flat lidded mouth of generous size, into which several pair of juvenile hands can be simultaneously thrust, and its plump body holds a surprising number of small favors. Its wicker handle, high and rounding, is a substantial affair, guaranteed to sustain the weight of the receptacle, and there is a long, projecting spout, from which a stream of tiny candies might easily be poured into the laps of the guests.

An Appetizing Side Dish.

One cream cheese, a gill of pure cream, a small jar of bar le due jelly and a little paprika may be made into a charming little "side" appetizer for a chafing dish party. First the cheese and cream are beaten to a froth to form a puffy cake almost filling a soup dish; then a hole dug in its center is filled with bar le due, and finally the entire surface is sprinkled with paprika. To write about it takes longer than to make this side dish, but it lives long in the memory of those who have eaten of it.

"PRINORE" AND "STANDARD"

Prineville Flour

Paint Your Home!

While White Lead and Oil is Cheap

We sell Pioneer White Lead at 10c per pound in 50 pound lots and up. Best on the Pacific Coast.

Boiled Linseed Oil at 85c per gallon. Guaranteed pure.

We have a lot of Cedar doors, different sizes, in 5-Panel and regular 4-Panel, 1 1/2 in. and 1 1/4 in. thick. All A1 goods which sell for \$1.50 and \$1.75.

All Prices Subject to Change Without Notice.

A FISH FEAST

is really a dish for an epicure—especially if you buy the "finney" from us. All our fish have the habit of coming straight here from their native element without hanging around elsewhere, losing their freshness and flavor. Shell-Fish a specialty in the season, but we keep nothing out of season, so you are always sure of a sweet smell here. Moderate prices, too.

City Meat Market

May 28 to September 30
