

RIBBON IS USED IN MYRIAD FORMS

Useful In Fashioning Bows, Belts, Sashes, Flowers and For Trimming Hats and Garments.

THIS seems to be a ribbon season. Never before have the ribbons been gayer and more varied nor have they ever been used in so many ways.

Ribbon is used in the making and trimming of hats and in the form of sashes.

Ribbon flowers are very popular, and any needlewoman possessed of skill can make such simple flowers as roses, daisies, forget-me-nots and violets. These can be made into wreaths suitable for hats or evening cuffs or into little bunches and nosegays for afternoon or evening dresses.

In fact, the woman of limited income whose purse will not allow her to purchase in the ordinary way the various little dress accessories of present day wear can make many of them for herself out of the contents of her ribbon drawer.

Ribbon flower brooches to be used as a slide for fastening a lace scarf or to provide a touch of color on a lace jabot are fashionable novelties which can be made at home from mere scraps of ribbon.

Modish little bows can be made of black velvet ribbon, with the edges outlined in steel beads. These beads are threaded on wire and then sewed to the edges and ends of the bow.

Black velvet bands for the neck are also much worn. These can be ornamented with tiny ribbon flowers and leaves or with a little jeweled neck slide.

Ribbon forms an excellent foundation for embroidery, and pretty bandeaux for the hair, as well as fancy ties and other trifles for neckwear which would appeal either to the vanity of the child or grownup, can be made by embroidering little tasteful designs or devices on remnants of ribbon.

From short lengths of wide ribbon dainty theater and vanity bags can be

SMART HAT AND SASH.

manufactured, while the various methods that can be employed for making workbags, sachet bags and needlecases are galore.

Many useful articles for household purposes can be made from ribbon by the woman who understands the simply acquired art of "ribbon plaiting." The making of table napkin rings is a splendid way of using up odd lengths of ribbon, as several colors can be employed in one ring, and no two rings need be alike.

The artistic woman who is clever with her paint brush has the opportunity of making delightful little gifts by painting suitable designs for various purposes on odds and ends of ribbon. Hatbands, belts and bookmarkers are but a few of the articles that suggest themselves. Ties decorated with the lucky device of the intended owner would prove an acceptable mascot to the superstitious woman.

Cotton agoric cloth was used in making the summer costume illustrated here, which is trimmed down the front with a line of crystal buttons. The jaunty little sash is of satin ribbon. Smart in the extreme is the hat of figured silk which comes down over the face and shades it comfortably. A band of ribbon and ribbon roses encircle the hat. The hat is finished with a plaited lining.

WOMEN WE DON'T LIKE.

- Women who talk all the time and never say much.
- Women who never say much and yet speak volumes.
- Women who say a great deal and do very little.
- Women who have good clothes but have a very ragged sense of honor.
- Women who have an idea they are religious mainly because they feel bad.

THE LATEST MODE.

Printed Cotton Suits
the Smart Wrinkle.

COSTUME IN PRINTED FABRIC.

Along the French Riviera this spring printed cottons have been the rage. This suit is in tones of green and white, the belt being of green leather and the hat green straw with geraniums.

A parasol of green and flame silk in pompadour design completes a striking but modish costume.

THE PERSONAL GIFT.

Three Women Who Make a Specialty of Birthday Offerings.

It would seem as if anything so entirely personal as a gift must adhere to the poetic formula that the "gift without the giver is bare," and at first blush it might seem as if a gift specialist would find few customers. But that is far from being the case. A group of three women calling themselves by this odd title has won a considerable reputation and a wide field of work. They are gentlewomen, who began this new enterprise after being asked to provide a little boy with a birthday box of surprises. The box was very successful, each inclosed package carrying some message in verse, written by the youngest of the gift specialists.

After the surprise box and in consequence of it they received an order from some one to get up a convalescent's box made on the same pattern, only for an adult this time, and then a steamer box. By this time the requests had become frequent, and, being of those who keep their eyes open for improvements, the three women began to invent all sorts of surprises and comforts for the amusement of children and convalescents and for the comfort of travelers.

They have now reduced the traveler's box to a science and have made it an ingenious affair, forestalling every want and necessity. They keep watch of the shops to find the latest patent in the way of the smallest folding coat hanger, the most convenient form of smelling salts, the daintiest paper towels, the most compact first aid to the injured packets. It is their business to be abreast of every invention. It may easily be seen that this is a form of specialization for which there is a demand, for how often has one wished she had only "known in time" of some new contrivance for making the journey of a friend less uncomfortable?

When Baby Goes Traveling.

When the baby goes traveling—and no consideration of distance or climate deters the up to date American infant from accompanying its wandering parents—it should have a combination bag of the latest pattern. This so called bag is a re-enforced braided strip of rubber lined mofre of one-half by one-quarter yard dimensions, hand painted on the outer side and on the inner side having compartments for wash cloth, sponge, absorbent cotton, gauze, talcum powder, ear sponge, soap, brush, comb and vaseline. The soap, vaseline and talcum powder are in ivory finished pyroxylin cases. The ear sponge, brush and comb are of ivory finished pyroxylin, and in addition to these toilet conveniences a sack lined with waterproof material runs the entire length of the case, which, when closed, has two inside flaps over the fittings and snap buttons which hold the front and back in position.

To Clean Carpets.

All carpets or rugs should be well beaten and rubbed with a broom before being cleaned. To beat properly hang them on a stout line wrong side out. The sticks used should be pliable, with cloth in the form of a knob, at the end to prevent tearing the carpet. After well beating the wrong side turn and beat the other in the same way. After the floor has been washed and become dry the carpet can be retinted and then cleaned with a damp flannel cloth wrung out of warm soapsuds or water containing ammonia or borax.

HEALTH HINT FOR TODAY.

Deep Breathing Exercises.
Breathing exercises develop the expansion of the lungs and thus increase the girth of the chest. They also develop the chest muscles and in this way thicken the flesh of the chest walls. They will not, however, increase the size of the mammary glands.

There is no special method of deep breathing that is absolutely essential. The best form of deep breathing is that sort which is produced by natural exercises. Those who need chest expansion should take every morning a cold rub in a cold room. Throwing off everything first, in the morning take a rough towel and rub all portions of the body fiercely, industriously. This will produce labored breathing, simply because the exercise requires it. The breathing should be accomplished through the nose.

HEALTH HINTS FOR TODAY

Boiling water will in half an hour destroy microbes which are most active. A high temperature is the most efficient disinfectant. Not only does a moist, high temperature destroy germs, but it is also a deodorizer.

If nervous people eat lettuce and celery it will soothe the nerves and promote rest and sleep.

Hot milk, sipped slowly, is efficacious for relieving the throat irritation that frequently follows a severe cold or is an accompaniment of a bronchial cough.

HEALTH HINT FOR TODAY.

Foreign Objects in the Ear.
When a foreign object has been in some way introduced into the ear do not become panic stricken. Allay the patient's fears at once. The object, whatever it may be, is prevented from reaching any vital parts, such as the drum, by the wax, which catches and holds it. If the object happens to be a bug it is best to introduce a little warm oil in order to kill the insect immediately. After this it may be removed with a syringe of warm water. Any object may be so removed unless it be a pea or bean or other object which is likely to swell with the introduction of water. In such a case the patient must be taken at once to a surgeon or doctor, who has the proper instruments with which to extract the object. In no event should the non-professional attempt to probe after the article with improvised instruments. The delicate membranes lining the auditory canals are almost certain to be injured, and there are many cases on record of rupture of the drum through this indiscretion.

HEALTH HINT FOR TODAY.

Sulphur For Diphtheria.
Powdered sulphur is one of the most efficacious remedies for diphtheria. Put a teaspoonful of powdered sulphur into a wine-glass of water and stir it with the finger instead of a spoon, of course first cleansing and disinfecting the hand. Sulphur kills every species of fungus in man, beast or plant in a few minutes. Instead of spitting out the gargle, it is better to swallow it. The gargle alone may be used in the first stages, but where the throat is too nearly closed to permit of the gargle use a quill to blow the powder into the throat. After the fungus shrinks the gargle may be used.

HEALTH HINT FOR TODAY.

Arm Strengthening Exercises.
George Bothner, the wrestler, gives the following rules for strengthening the arms: Bring the left arm in front of you, elbow against the waist and palm turned upward. Grasp the left hand with the right and while holding down with the right draw the left up to the shoulder. Relax the muscles and return the hand to its original position. Repeat this five times in the morning and ten times at night. Reverse the position of the hands and exercise the right arm in the same way.

Place the left hand in front of the chest, palm turned outward, and grasp hands as before. While opposing the motion with the right hand straighten the left arm to its full length. Repeat this five times in the morning and ten times at night. Reverse the position of the hands and exercise the right arm in the same way.

Have You Seen the Coupon Now in Liggett & Myers Duke's Mixture

Liggett & Myers Duke's Mixture makes a great pipe smoke—and rolled into a cigarette nothing can beat it.

It is the favorite smoke of thousands of men who want selected, pure, Virginia and North Carolina bright-leaf tobacco.

If you have not smoked Duke's Mixture, made by Liggett & Myers at Durham, N. C.—try it at once.
