Baby Falls Into a Pan of Hot Water

Dr. Edwards was called to Lamonta Gap Tuesday to attend to the 2-year-old son of Fletcher F. Wright, who fell into a pan of scalding hot water.

The youngster was fished out immediately by its mother, but not before it was pretty badly burned. The mother had just placed the pan on the floor and turned to attend to something at the stove when the boy toppled over into the pan. The child will not be disfigured.

The "Story of the Cadillac," is one of that mechanical and commercial advancement which makes for permanency. The Cadillac Company has never yielded to clamor by producing that which catered merely to fancy, nor that which took advantage of the uninformed. On the contrary it has produced only that which it knew would give to the purchaser "value received" in abundant measure. The Cadillac Company has never been obliged to resort to exaggeration and over-drawn claims to dispose of all the cars that it could make—and more. Its policy has ever been to under-claim rather than over-claim. It is gratified that the public accepts its representations at their full worth; because the public has never been misled and because the public could always expect and has always received more than was offered.
