### WHAT IS WRONG WITH YOUR EYES?

Do you find that your vision is not so good as when you were younger? Can you thread a fine needle as quickly and as easily as ever? No? Don't you think it would be prudent on your part to have your eyes examined? You'll see the wisdom of your having done so when you will have grown older. My method of examining eyes is scientifically exact. It will cost you nothing.

The "Story of the Cadillac," is one of that mechanical and commercial advancement which makes for permanency. The Cadillac Company has never yielded to clamor by producing that which catered merely to fancy, nor that which took advantage of the uninformed. On the contrary it has produced only that which it knew would give to the purchaser "value received" in abundant measure. The Cadillac Company has never been obliged to resort to exaggeration and over-drawn claims to dispose of all the cars that it could make—and more. Its policy has ever been to under-claim rather than over-claim. It is gratified that the public accepts its representations at their full worth; because the public has never been misled and because the public could always expect and has always received more than was offered.
