RIGHT TO INHERIT.

The question whether inheritance is an inherent right or a grant from public society has been already considered by such great jurists as Theophilus, Cicero, Grotius, Vinnius, Cojas, Puffendorf, Bynkerschoek, Leibnitz, Doneau, Lord Mansfield, Montesquieu, Merila, Toullier, Proudhon and other equally great jurists and philosophers of all times and places, and the best thought of the world at the present time is generally conceded to be expressed by the conclusion that the right to dispose of property after death is a natural and inherent right of mankind which cannot be taken away by the state. It is said by one of the greatest of the world's jurists, Troplong, that no country is entitled to be regarded as free where a right to dispose of property by will does not exist.—Judge R. L. Fowler, Surrogate, of New York.
