

### Powell Butte

Quite a crowd gathered at the G. L. Braze ranch Tuesday to attend the auction sale of hogs, cattle and horses. Early in the sale, however, it was seen that most everyone had come just to see what the other fellow was going to buy and bidding soon stopped altogether with the result the auctioneer called the sale off. Folks in this locality are all pretty well stocked up and grain being so high is not to be humored, so the farmer men thought.

Mr. and Mrs. Bert Reynolds of Redmond visited at the E. A. Bussett home Wednesday.

Mr. and Mrs. Guy Dobson and Mr. and Mrs. B. A. Kendall of Redmond attended the Braze sale Tuesday.

Mrs. J. F. Rice was hostess to the Powell Butte Sorosis Wednesday afternoon. About a dozen ladies were in attendance and a pleasant afternoon passed. During the social session an appropriate luncheon was served by the hostess, assisted by Mrs. W. G. Mustard. The next meeting will be with Mrs. Ida Morse.

Born—To Mr. and Mrs. Lee Hobbs on Thursday morning, a son.

Mr. and Mrs. John Saxton of Opal City, the latter a sister of N. P. Alley, visited at the Alley home Thursday, returning home Friday. Mr. and Mrs. Saxton, who are newly weds, were given a rousing welcome Thursday evening by a crowd of young folks, reinforced by some older ones.

Mrs. W. A. Nanny of Deschutes was a guest of Mrs. Allen Wilcoxen from Wednesday to Friday of last week.

The Misses Chabot, sisters of Mrs. Earl Forrest, left Wednesday for their home in Bellingham, Wash., following an extended stay here.

Mr. and Mrs. Ross Bussett entertained the Shobert family and E. A. Bussett family at dinner Thursday.

Mr. and Mrs. W. E. Young of Redmond were dinner guests at the Allen Wilcoxen home Wednesday evening.

J. A. Riggs has been up to Bend for the past several days attending to the sale of some beef cattle.

Geo. Hobbs is entertaining a cousin from Oregon City who arrived the latter part of the week.

Mrs. William Parish arrived from Baker City last week to join her husband on the Geo. Hobbs place. It is needless to say that "Bill" is happy.

Mr. and Mrs. Henry Tweet and family moved to Bend Sunday. We regret very much to lose this family, but we will all have some place to visit when we go to Bend. Mr. Tweet intends to run a blacksmith shop.

Mr. and Mrs. Earl Forrest who have rented their place to "Bill" Johnson left for Bellingham, Wash., Monday evening.

Foster Bros. started on the last heat of fall threshing Tuesday morning.

S. E. Sheperd arrived Sunday from San Francisco and is visiting at the E. A. Bussett home. He will probably remain for the winter. Mr. Sheperd is a pioneer of this section and his many friends are glad to see him again.

Messrs. Guy Lafollette, Colonel Smith, Levi Earnest and Geo. Braze shipped hogs to Portland Tuesday. McSherry had charge of the shipment, included in which were two cars of cattle from Mr. Braze.

Earl Saunders and E. A. Bussett sold several loads of hogs to McMickle of Redmond, delivering them Monday.

A number of our farmers have teams working at the ditch works east of Bend, several going up Monday morning with the intention of staying as long as horse feed lasts

when they will return for more feed. The present fine weather is favorable to their work.

Mrs. Jones and sons went to Prineville Monday where Ralph will remain and attend the C. C. H. S.

J. J. Chapman, who has been working as operator at Carson is expected home for a brief visit with his family, after which he will be employed in a like capacity at the Redmond station.

### Sisters.

Earl and Arthur Grube are home for a few weeks.

Mrs. Hardy Allen's sister, Miss Davidson, arrived from Hood River and took up her school duties in district No. 7 Monday.

C. Carson and C. Wood have returned from Prineville.

Mrs. Hineman is home from a visit to Prineville.

W. S. Rodman and son and Mr. McCaffery were transacting business in Sisters the first of the week.

J. McKinney joined his family who have been visiting here for some weeks.

A number of Indians are camped near Sisters waiting for the Sisters fair in which they hope to have a part.

Mr. Minor of Bend was in this vicinity several days last week.

J. H. Haner and wife and Mr. Gould and wife of Bend were doing business in Sisters Thursday.

J. E. Myers was visiting the schools all through this section the last of the week. He found them all doing excellent work. He advocates good schools to build up a town or country.

Mrs. George Cyrus walked to Mrs. Welae's Saturday.

Mrs. Gompers entertained Sunday evening complimentary to Inez and Olive Buckner and Mrs. Temple, all of Redmond.

Mrs. Cyrus and daughter, Mrs. Welae, visited at the Clyde Johnson home Wednesday.

Walter Boyd entertained at dinner at his bachelor quarters Sunday.

We are all busy getting ready for the Sisters fair.

E. L. Johnson vs. G. T. Scott and L. Gist. Default and judgment as to G. T. Scott.

Edna Shonka vs. E. F. Shonka. Decree granted.

Alfred Munz vs. F. T. and Josephine Redmond. Settled and dismissed.

Redmond Bank of Commerce vs. R. C. Immele. Dismissed on motion of plaintiff.

J. A. Pickett vs. W. A. Pickett. Default and judgment and order to sell attached property.

E. W. Richardson vs. Lannie Kurrie et al. Settled and dismissed.

F. D. Olmstead vs. O. G. Olmstead. Decree granted.

W. A. Booth vs. J. A. Boyd. Default and decree.

Roy J. Thomas vs. Henderson and Curlers. Default and judgment and order to sell attached property.

J. H. Haner vs. S. F. Knight et al. Default and decree.

Crook county vs. C. W. Allen. Default and decree.

E. A. Bussett vs. Allen and Ada Landfare. Default and judgment.

Julia I. Allen vs. Willie Allen. Decree granted.

John Combs, trustee, vs. J. W. and Viola Horigan. Settled and dismissed.

State Bank of Redmond vs. Earl Forest. Default and decree.

Crook County Bank vs. C. W. and Mattie M. Waugh. Confirmation granted.

### Work Wanted

A winter's job on ranch by middle aged man. State wages. Address FLOW WADE, Laidlaw, Ore., care Camp 6. 10-1

### Easy Money Lands Culprits in Jail

Issuing checks on the Crook County Bank in which he had no account, caused the arrest Tuesday night of Raymond Allen and Roy Creswell. Allen drew the checks payable to Creswell and the pair had a good time.

Jack Curtis cashed one for \$26 10; Hughes & Stevenson got another for \$12 in payment for merchandise and the Oregon Bar took one for \$5.

Curtis got wise first and notified Sheriff Elkins of the transaction. The sheriff got busy and located the men at Redmond and their arrest followed. Allen has been drinking heavily of late and claims he issued the checks while under the influence of liquor. They have not yet had their preliminary hearing.

### The Towner Experiments

Continued from first page.

try. This will follow from some of the grains that was then introduced. One of these was a kind of wheat. This wheat is known as the Marquis. It came originally from Canada. It is a No. 1 hard milling wheat when grown on dry land and it makes the very finest kind of flour. This wheat has proven itself well adapted to dry land conditions. Mr. Towner has found it to yield more than twice as much as other varieties of spring wheat that have been grown on his farm. These include the Dawson, which is usually considered a good kind of wheat for dry areas.

"The Manchuria barley, sometimes called Mensury, was also sown in 1913-14. It was found that both seasons it produced far more than any other variety of barley except the Gaymols, which Mr. Towner has grown for but one season. This barley is six-rowed, and is a strong and vigorous grower. It matures early and is relatively hardy. Compared with the White Hulless grown beside it in 1913, it gave a very much better yield.

Mr. Towner has also grown a variety of oats in 1913 that yields very much better than the oats ordinarily grown here. If memory serves correctly these are the Lincoln and another variety that is even more promising. He is putting these grains on the market so that each farmer can only obtain but a few bushels of seed. The object is to give the greatest number of farmers an opportunity to get a supply of this seed.

"It is to be regretted that these experiments were not continued by the S. P. & S. Railway as there are many problems of vital interest to the dry country that have not been worked out.

"Mr. Towner has succeeded in getting a very fair stand of alfalfa sown along with a nurse crop of barley thinly sown, but experiment has shown that a much stronger stand was obtained when the seed was sown alone. This alfalfa will irrigated next season.

### For Sale

Two lots Noble's Addition; \$240 terms; \$200 cash. W. J. PAINE. 10-1

### Call for Warrants

Notice is hereby given that all registered General Fund Warrants up to and including register No. 339, will be paid on presentation. Interest stops Oct. 1, 1914. RALPH L. JORDAN, 10-1 Treasurer and Tax Collector.

The Dalles Model Laundry High-grade laundry work. Send in your laundry by Parcel Post. Prompt attention. R. J. GILBERT, Proprietor. 6-18

### Thought His Mare Was Bitten by Coyote

Eugene Phillips of Roberts brought a fine young mare to Prineville Monday to have her examined for rabies.

Friday Mr. Phillips found the animal with one of her forelegs scratched or bitten as though done by a dog or coyote. The abrasions were made clear around the leg and did not look as though caused by barbed wire. By Monday the animal appeared listless and dejected and had the outward appearance of being sick. Mr. Phillips did not want to take any chances so brought her to town to be examined by County Veterinarian Nevel. The examination could prove nothing. Even if infected with hydrophobia it would take more than a few days to develop. About the only thing that could be done would be to watch the animal and if rabies symptoms become pronounced either isolate her or kill her.

Mr. Phillips is a neighbor of Emil Von Lake who was bitten on the hands by a mad coyote a couple of weeks and naturally gets apprehensive when his stock does not look or act right.

### W. C. T. U. Convention Held at Madras

The W. C. T. U. had a rousing convention at Madras the first of the week. The following officers for the ensuing year were elected: Mrs. J. B. Shipp, president; Mrs. Winnek, corresponding secretary; Mrs. Dizney, recording secretary; Mrs. Ellis, treasurer.

A large number of delegates left Madras Tuesday for the state convention at The Dalles.

SONNET CXLVI. Poor soul, the center of my sinful earth, Fool'd by those rebel powers that thee array, Why dost thou pine within and suffer dearth, Painting thy outward walls so costly gay? Why so large cost, having so short a lease, Dost thou upon thy fading mansion spend? Shall worms, inheritors of this excess, Eat up thy charge? Is this thy body's end? Then, soul, live thou upon thy servant's loss And let that pine to aggravate thy store; Buy terms divine in selling hours of dross; Within be fed, without be rich no more. So shalt thou feed on death that feeds on men, And, death once dead, there's no more dying then. —William Shakespeare.

THE WAR PRAYER. O Lord, help us to tear the soldiers of the foe to bloody shreds with our shells, help us to cover their smiling fields with the pale forms of their patriot dead; help us to lay waste their humble homes with a hurricane of fire; help us to wring the hearts of their offending widows with unavailing grief. Blast their hopes, blight their lives, water their way with their tears. —Mark Twain.

BECAUSE the road was steep and lone And through a dark and lonely lane, God set upon my lips a song And put a lantern in my hand.

THROUGH miles on weary miles of night That stretch relentless in my way My lantern burns serene and white, An unexhausted cup of day.

GOLDEN lights and lights like wine, How dim your boasted splendors are! Behold this little lamp of mine. It is more starlike than a star. —Joyce Kilmer in Century.

Music Lessons Miss Williams will continue her classes in Vocal, Piano and Harmony study this winter. Ear Training is to be added to the course for singers without extra charge. High school pupils will be given credit in the schools for their work in music. Anyone desiring to arrange for lessons see Miss Williams or 'phone Red 581. 9-24

For best quality milk, cream, butter and buttermilk 'phone Wm. S. Ayres. 4-30-tf

### BUTTERMAKING SUGGESTIONS.

The Washington experiment station has lately published some condensed hints on farm buttermaking which are good for farmers everywhere. If followed there would be great improvement in the quality of American dairy butter. The suggestions as given below should be used for reference:

Cool the cream from the separator as soon as possible to 55 degrees F. or lower.

Never mix warm cream with cool cream.

Mix all the cream to be churned in one vat or can at least eighteen hours before churning.

Ripen at a temperature of 70 to 75 degrees F. for from six to eight hours, stirring frequently during this period.

Cool cream to churning temperature as soon as ripe.

Let the cream stand eight hours or more overnight at the churning temperature.

The temperature of churning ought to be such as to make the butter come in from thirty-five to forty minutes, usually 55 to 60 degrees F.

If it is desired to use artificial coloring it should be added to the cream just before churning.

Stop churning when the granules are about the size of peas, varying to the size of wheat, and draw off the buttermilk.

Wash the butter once with pure water at the churning temperature, agitating three or four times, and then drain.

Wash a second time with water about 4 degrees above churning temperature, agitating seven or eight times, and drain.

Add the salt wet while the butter is in granular form, using about one to one and one-half ounces for each pound of butter, according to the demands of the market.

Work the butter just enough to distribute the salt evenly.

If the butter is to go on the market it should be put up in neat, attractive packages.

### A SHEEP AND WOOL CONFERENCE.

On June 2, 3 and 4 there was held in Washington a conference of those interested in the sheep and wool industry. Among many important topics discussed were the manufacturing value of American wools, the improvement of farm and ranch methods of handling wool, the possible adaptation of foreign methods to American conditions, the standardization of the wool clip and the prevention of losses by dogs and other predatory animals. As a rule, American wools are of high quality, but the indiscriminate sacking of wool, the use of poor twine and of insoluble paint in marking sheep are jointly responsible for a loss to producers estimated at from 5 to 20 per cent of the total clip.

### RABBITS DESTRUCTIVE.

From the standpoint of the writer it seems like a good deal of a fiasco for rabbits to be protected by law, as they are in a number of central and eastern states, when they do a very large amount of damage to farmers and gardeners. Even though they may pull up some corn and eat some newly planted seed, there is ground for protecting pheasants and quail, for they more than pay for their cost of keep in the service they render. The rabbit, however, performs no such service, and the only excuse for encouraging their propagation is that men and boys may have something to shoot at. However, this ought not to weigh against the financial welfare of the farmer and gardener.

### SULPHURET OF LIME.

The following is an English recipe for making sulphuret of lime, which is recommended as a remedy for curing poultry of the feather eating habit. Put three or four lumps of freshly burned lime the size of an egg into a iron pot and shake with boiling water, then stir in about six ounces of flowers of sulphur and add gradually two quarts of boiling water, stirring the white. Boil for an hour or so, then pour off the clear liquid, bottle and

Do you know you can buy a new Elgin watch for \$5.50 at L. Kamstra's? If you are looking for a watch be sure to call on him and get his prices. 8-20tf

cork tight. A tablespoonful of this liquid to every six hens, put into the mash, is the best way to give it. Given a couple of times a week, this remedy is said to keep the plumage in good condition and soon puts a stop to the feather eating habit.

### ABOUT TRIMMING TREES.

For those who undertake the trimming of trees for the first time it is a suggestion worth remembering to saw from beneath close to the tree on limbs of considerable size. After making a cut of fair depth the sawing may be done from the top side. This precaution prevents the splitting down of the limb and the marring of the trunk just beneath. A further safeguard in the cutting off of large limbs is to take them off a foot or more from the trunk, later taking off the stub. All limbs should be removed in such a way that the cut will be as close to the trunk as possible and on a line with the one of the trunk.

### TOMATO BYPRODUCTS.

In Italy there are several manufacturing concerns that are now utilizing tomato waste in the making of valuable byproducts. From 1,500 tons of dried residue 150 tons of tomato seed oil have been secured and 800 tons of oil cake. The oil byproduct has been found a valuable element in the manufacture of soap.

J. C. Trigg

### RIGHT MOTIVES.

In determining proper motives of conduct it is easy to perceive that the higher are more commendable than the lower and that even an act of justice and benevolence loses something of its charm when known to be inspired by the selfish desire of human applause. It was the gay poet of antiquity who said that concealed virtue differed little from sepulchered sluggishness. But this is a heathen sentiment, alien to reason and to truth. It is hoped that men will be honest, but from a higher motive than because honesty is the best policy. It is hoped that they will be humane, but for a nobler cause than the fame of humanity.—Charles Sumner.

### RIMED QUOTATIONS.

Sear not too high to fall, but stoop to rise; —Massinger. We masters grow of all that we despise. —Crowley. Oh, then, renounce that implous self esteem, —Beattie. Riches have wings and grandeur is a dream. —Cowper.

The farmers are in need of personal leadership. They have political leaders, but they need local industrial community and industrial leaders.

All fishing goods reduced 25 per cent. L. Kamstra. 8-20tf
