Tree Bears Double Crop.

Cottage Grove.—It is not unusual for fruit trees in the Willamette valley to produce two crops during a year, but it is unusual for trees to produce two crops at the same time, which is true of some trees owned by J. N. Lindsay, of Creswell. The fruit in question is Burbank prunes and cherries. The crop of prunes is about the size of peanuts, irregular in for-

mation and appearing to have suffered some blight.

The crop of cherries appears to be perfect. Part will mature about ten days ahead of the remainder.

Governor Names Fish Commission.
