MAJESTIC STEEL RANGES!

Cooking three big meals a day is hard work at best; you should have a Range that makes cooking easier!

THE MAJESTIC

Is built right; from pipe to base malleable and charcoal iron—metals that outwear ordinary range materials three to one. Joints are cold-riveted airtight, without putty—they stay tight. Lining of extra heavy pure asbestos further helps to hold in the heat. These features, together with special type of firebox, oven and circulation system, mean uniform baking heat with minimum fuel.

MAJESTIC costs a little more than ordinary ranges, but it lessens the work of cooking, requires the least fuel and repairs—wears years longer.

The 15-gallon all-copper reservoir heats water as quickly as a kettle on a stove top. Oven door lowers onto heavy braces, oven rack stays level, under load, when pulled out. Reservoirs flush with stove top have aluminum lids.

When you know what a Majestic will mean to you, you'll get one. Call at our store and examine this perfect range.
