DESTRUCTIVE FIRES AT BEND

Clears Lumbering Plant of Its Entire Stock of Four Million Feet

A fire which destroyed all the lumber on hand in the yards of the Bend Company at Bend last Wednesday, caused a loss which is estimated at some \$60,000, a part of which will be recovered on the insurance.

The fire originated in what was known as alley number three, about 3:30 in the afternoon and spread rapidly until, for a time it seemed that the mill and all the buildings of the company would be lost. It burned until late in the evening before it was finally controlled.

Some heroic work was required to save the mill. Lumber piles were dynamited and other heroic measures were taken to control the flames.

A fire which originated in the dining room of the Hotel Bend at that place on Monday night, completely destroyed that structure, and only by the most diligent efforts on the part of the firemen were other buildings protected. Most of the contents of the building were saved.

The building is said to have been insured at something like \$8,500

Candidates in The Journal's Popular Voting Contest

Only Two Days Remain In Which to Get Votes For The Ladies' Watch

Awarded Saturday Evening At 8 O'clock P. M.

This has been a busy week with the candidates in the contest for the Ludwig piano and other prizes which are to be given away by the Journal in its popular voting contest.

The leadership in the race has been held by different candidates. Pearl Osborne lead for several days and is a strong candidate, but gave second place early in the week to Ada Sears of Powell Butte. Later however, the lead was taken and is now held by Mrs. Birdie S. Norton, of Post who has a strong support in that part of the country.

Mrs. Jessie Jones in the Independent telephone exchange entered the race late, not having been nominated until the first of the week, and has gained votes rapidly until she is well up in the list. She promises to become one of the strong candidates. Others of the candidates have been delayed in the start for various reasons, but are preparing to get into the contest soon.

It is not too late for new candidates to get into this contest. All you have to do is to fill out the nominating coupon and bring or send it to this office, and get a receipt book and get busy.

Some of the candidates have asked if the nominating coupons can be used after the contest has started. We wish to make that point clear. Only one nominating coupon can be credited to a candidate, others sent in for the same person will not be credited to that person.

The standing of the candidates at 6 o'clock Thursday evening is given below. Don't forget that the Elgin watch will be given on the Saturday evening at 8 o'clock to the person having the greatest number of votes in the office at that time. We can't count the votes you have in your pocket, or promised to you. They must be in the office at the hour named to be considered. If the candidate winning the watch is not present, it will be sent by registered mail on the Monday following.

Courses of Study High School Crook County Leads In Education of Youth

THE SCHOOL

It has always been the policy of the Crook County High School to recognize the difference in inclination and natural ability of individuals. With this in view, it offer a variety of courses intended to suit the individual needs of all students that may wish to attend. The primary aim of the school is to furnish as broad and complete a course as possible to those who find that they cannot carry on their education farther than graduation from either of its four year courses. The secondary aim is to furnish the student with a complete preparation for entrance in college.

In equipment the high school is well prepared to carry on the work as appended below. It possesses a splendid library of over a thousand volumes of reference works. The physical and chemical laboratories are well equipped with apparatus and material so that students taking the scientific and the agricultural courses will receive every possible advantage.

Apparatus for iron working has been installed in the Manual Training department giving a full 4-year course in Manual Training.

Another large wood range, and practical laundry apparatus have been installed in the Domestic Science Kitchen, thus adding to the efficiency of that department.

A number of new typewriters and a Burroughs Adder have been secured for the Commercial Department.

Arrangements have been made whereby students in Normal Training may have actual charge of classes, under the best of supervision, in the grades of the Prineville Public School. Students receive real normal school methods and practice teaching in the Crook County High School. Graduates from the normal Course will receive, without farther examination, a one year state teacher's certificate issued by the State Department of Education.

VARIETY OF COURSES

In order that students and patrons may not feel that the school requires subjects that are useless and unnecessary to their best interests, the number of required subjects has been considerably decreased and the privilege of election on the part of the students has been extended. In granting this privilege the faculty has exercised care to offer no elective subjects that will lower the standard of the school.

There are six distinct course offered, viz: English, Scientific, Commercial, Normal, Domestic Science and Art, and Manual Training. Besides the courses mentioned above, courses in public speaking and debate will be offered. Any student who desires to elect the study of music and devote one hour each day to practice will receive two semester credits each year for same. Provided, that no student shall receive credit for the study of music except by the authority of the superintendent.

STUDENTS

The student may elect either of the six courses. A diploma from either will admit the bearer to the State University or to any university in the state without examination.

A student is expected to carry four subjects, but no one who receives a grade below 85 will be permitted to carry more than four subjects at one time.

A credit is one semester of successful work in a subject, and thirty-two credits are required for graduation.

Credit will be given for proof of successful work done elsewhere. No student who is not carrying full work, earning passing grades, nor exemplary in deportment, will be permitted to represent the school in athletic or other school contests.

FACULTY

The Faculty of Crook County High School consists of Specialists. The members have been chosen from the best schools and colleges of Oregon, Washington and Idaho for their particular department. The Board has left nothing undone to provide for the youth of Crook county, school facilities second to none in the state. Below is the Faculty for 1915-16.

H. C. Baughman, Superintendent; Cathrine V. Conway, English; Evelyn L. Walker, Normal; J. Wesley Smith, Mathematics E. E. Evans, Commercial; Robert E. Davis, Manual Training; Nell Sykes, Domestic Science Arts.

Following is the High School Board: G. Springer, County Judge and Ex-officio Chairman; J. E. Myers, County school Superintendent and Ex-officio Secretary; Ralph L. Jordan, County Treasurer; J. F. Blanchard, County Commissioner; H. J. Overturf County Commissioner.

BUILDING SILOS CENTRAL OREGON

Encouraged and Assisted by the Officials of the O-W R & N Railway Company

Lon S. Smith, assistant agriculturist for the O-W. R. & N. Co., is in today, looking up the farmers who are putting in silos, says the Madras Pioneer. He, in company with M. G. Pillette, local manager of the Tum-A-Lum Lumber Co., and a Pioneer representative, went to the Young ranch, north of town, where Mr. Young has built a silo.

Mr. Smith is getting data on the number and styles of silos which are being built or contemplated, in this section, in the interest of the railroad company, which is making a strong effort to induce the farmers of Oregon to raise more corn.

The raising of corn is a matter which is being considered more and more each year and the O-W. R. & N. Co. holds corn shows every season, offering prizes for the largest yields on a given acreage, and for the best, largest and most perfect ears.

The trip to Mr. Young's place was profitable and the time well spent. Last year he built a silo 10x24 feet, the pit being about ten feet in the ground, having a capacity of 40 tons. Mr. Young proves his progressiveness by being the first farmer in this section to build a silo, and while it was his first experience with one, he says it has proven very satisfactory. He will start filling it with corn next week.

C. V. Duling has also started building a silo on his place near town, and will use it this year for the first time.

Mr. Young was much pleased with Mr. Smith's visit, as he received from him information of value in regard to the proper filling of the silo, and treatment of the ensilage to make the best feed. Pictures of the silo were taken by Mr. Smith, which will later appear in the Pioneer. Mr. Smith will leave this afternoon for Hay Creek, where the B. S. & L. Co is building two large silos for use on their ranches.

A Record Spread In Temperature

Prineville has experienced a very wide range of temperature during the past four days. On Sunday the weather man got busy and shot the mercury up to the record height for the year, which was 106 by the government thermometer. Last night it dropped to 34 degrees; just two degrees above the freezing point. Tuesday night it registered 37. Commencing a week ago last Monday the maximum temperatures were: 98, 100, 100, 99, 100, and on Saturday 102, Sunday 106. The records for Prineville are kept by Mrs. T. M. Baldwin and are accurate.

E. N. Strong of the Oregon Life is in Prineville on business connected with his company.
