DISEASE AND ITS MASTER CHIROPRACTIC

Disease is a lack of or an excess of function in any part of the body. All function is controlled by mental impulses from the brain. Therefore the CAUSE OF DISEASE must be an interference with the line of communication between the brain and the diseased part. Why not remove the obstruction and restore free communication? Chiropractors do this by adjusting the subluxated vertebra causing the obstruction. Such diseases as Appendicitis, Asthma, Bronchitis, The Grippe, Gout, Headache, Typhoid, Pneumonia, Paralysis, Diseases of the kidneys, Stomach, Bowels, Liver, Bladder, Pelvic Organs, Lungs etc., and many others are being successfully treated by Chiropractic adjustments. Edison says: "The doctor of the future will give no medicine, but will interest his patients in the care of the human frame, diet and in the cause and prevention of disease."
