Register early, and avoid the rush.

Are Your Hens Laying Eggs or are they Non-Producing For the Lack of Proper Winter Foods and Attention?

HOW TO GET MORE EGGS

In winter a regular system of feeding should be adopted and steadily adhered to throughout. Give your hens a comfortable shelter with plenty of light; keep dry, clean and well ventilated, but avoid draughts of cold air. Feed regularly a variety of good clean food. Table scraps thickened with bran, boiled together, are also very good in winter, to which add a teaspoonful of DR. HESS' POULTRY PAN-A-CE-A as directed. Give in a mash of wheat, bran and shorts which should constitute the morning feed. In winter give warm. Small grain should be thrown among chaff, which will compel the fowls to exercise. Keep fowls well supplied with fresh water and plenty of grit, bone or oyster shell. Keep your hens free from lice by adding DR. HESS' INSTANT LOUSE KILLER in the dust bath every other week.
