The Early Swat Wins Against the Deadly Fly

At the first approach of cold weather the flies seek warmth and protection in houses and stables. From cellar to garret they hide in nooks and corners. Keep them out, if any succeed in getting in kill them. Swat every one that shows itself and be sure to burn their bodies.

Facts About the Deadly Fly

FLIES breed in manure and filth. Flies carry disease germs on their feet. Flies leave the disease germs on food, dishes, etc. Thousands of babies and grownups are killed in this way by flies.
