

## No Old Stuff Here!

Reliable ketchup, olives, salad dressing, oils and things of that sort in bottled form are offered from fresh stock.

We do our ordering from the wholesaler in a way that keeps old stuff off our shelves.

This is important.

## McCormick Elevators Turn the Trick

DID you ever go into a field of grain where one side was tall, heavy, and perhaps lodged? Then on the other side find the stand thin, short, and over-ripe? It's a pretty hard matter to set your binder so it will take care of such conditions without loss from shelling or without clogging, isn't it? Here is where a McCormick binder proves its true worth.

### The McCormick has an Elevator that Floats at Four Points

This means that if the grain is thick, tangled, and matted, the upper elevator will expand to allow the increased volume to pass through, and then drop back to its original position for short, thin grain. There are no changes or adjustments to make—the movement is entirely automatic. Come in and see how simple this valuable feature is.
