

National Defense and International Peace

What the Engineers are Doing

THIRTY thousand American engineers are making a card index survey of American industry so that it may be prepared for its vital part in defending the Country, it need comes. The past eighteen months have taught us here in America what lack of industrial preparedness has meant to some of the countries now at war. These nations had the ships and they had the men; but when the hour struck, their factories were not able to furnish the colors with arms and shells and powder. Their factories were not prepared. And our factories are not prepared.

But it is not enough to draw a moral. In the United States five great Engineering Societies - Civil, Mining, Mechanical, Electrical and Chemical - have pledged their services to the Government of the United States, and are already working hand in hand with the Government to prepare industry for the national defense. They receive no pay and will accept no pay. All they seek is opportunity to serve their country, that she may have her industries mobilized for defense.

All elements of the nation's life - the manufacturers, the business men, and the workmen - should support this patriotic and democratic work of the engineers, and assist them cheerfully when asked. There can be no better national insurance against war.

The Associated Advertising Clubs of the World, representing all advertising interests have offered their free and hearty service to the President of the United States, in close co-operation with these five Engineering Societies, to the end that the Country may know what the Engineers are doing. The President has accepted the offer. The Engineers have welcomed the co-operation.

This advertisement, published without cost to the United States, is the first in a nation-wide series to call the country to the duty of co-operating promptly and fully with the Engineers.

Now Here For Your Inspection!

THE WILEY B. ALLEN COMPANY'S IMMENSE BUSINESS

Has been developed upon a belief in the common sense of our public, meaning by "our" public those people who realize that it is good judgment and economy to pay fair prices and get good pianos.

Our business consists exclusively of selling Pianos and Player Pianos

of the most advanced type, at prices which represent their actual retail value. We have no profits to add in order to cover the expenses involved by providing gift inducements to purchasers.

Our profit is simply a fair percentage on the cost of the instrument

There is a Vast Difference Between Piano Value and Piano Cost

Value represents the cost of production, plus a reasonable profit. That is as it should be and is fair to all. At all of the Wiley B. Allen stores, from Mexico to British Columbia, every instrument is sold on the closest possible margin of profit. The payment of commissions to outsiders to influence you to buy, or for "tipping off" your name as a prospective purchaser does not add to the value of a piano, but it does add to the cost and for which you must pay. Your interest does not cease when the sale is made. We consider the transaction closed only when we know the instrument has proven its worth in the hands of its purchaser. These statements briefly express the policy of the Wiley B. Allen Co. and we believe it is the only way in which the piano business can be conducted honestly. Following is the list of makes we sell, each the recognized standard in its respective grade.

Mason & Hamlin, Hardman, Conover, Melville Clark, Ludwig, Kingsbury, Wellington, Harrington, Price & Teepie Milton and Rembrandt. In player pianos, the Angelus, the Solo, Apollo, the Carola and others

No matter what may be your piano desire, no matter what may be your income, we are in a position to satisfy that desire and to make the ownership of a really good piano or player piano a more economical proposition than can any other firm. We will be pleased to send catalogue and prices to anyone. We will accept your old instrument as part payment on a new one.

Your Money's Worth or Your Money Back

The Wiley B. Allen Co.
