

National Defense and International Peace

Preparedness and Peace and the Engineer

THE United States desires peace, based on justice and maintained with honor. But to insure this kind of peace Americans must know that nations are now defended not alone by fighting men, but by fighting industries.

The Engineers of this country, trained as only American Engineers are trained, hold that truth to be as fundamental as the law of gravity. With the authority of the United States Government more than 30,000 Engineers and Chemists, members of five eminent American scientific bodies, are making for the first time in the history of the Government a minute, sweeping survey of the industrial resources of America. They will go to the factories and mines of the land and with their sole method, efficiency, and their sole motive, patriotism, form a vast, flexible organization, such as the world has never known.

Their work will be the basis for creating in this country a true line of defense in time of war—the ability to produce swiftly, abundantly and with sustained power all the thousand and one elements of modern warfare. Without such production there can be no efficient army and navy.

Military Preparedness wins the battle. But *Industrial Preparedness* wins the WAR! Industrial Preparedness involves no huge expenses. Only the KNOWLEDGE of what American industry can do. To KNOW the extent of each plant, the equipment of each shop, the capacity of each machine, the ability of each man. THAT is the essence of industrial preparedness. That is the task to which thirty thousand Engineers are pledged.

The Engineers work will lay for all time the ghost of the "munition trust" by making it possible to have munitions made in thousands of plants. The vital work of the Engineers will supply the military authorities in Washington with information never before collected, and it is carried forward without a dollar's cost to the Government. And this advertisement is not paid for. The Associated Advertising Clubs of the World have prepared the copy and the publishers have patriotically responded and printed it without pay for the sake of National Defense and International Peace.

All Americans are asked to strike hands with the Engineers so that America shall have time to raise up an impenetrable wall of defense against a day of trial.

ABSOLUTELY RIGHT.

The people of Prineville and surrounding country will be disappointed no doubt in the news imparted to them in this issue in connection with our railroad.

Plans were all made and construction should have been under way within a short time had the bonds sold as everyone expected them to on Tuesday evening.

But on the other hand, the facts are that the matter is only delayed thirty or forty days, and the council and the people who are informed know that there will be no delay this time.

There is more of a feeling of certainty than before, for the reason that the council knows now wherein they erred, and are making no mistakes this time. In fact the history of municipal bonds in this state has been that a second election is quite common.

The first election held on the same matter in Bend was not sufficient, and another will be held.

Grants Pass, Roseburg and Ashland have all experienced the same things, and in Prineville we welcome the opportunity since it is our lot, for on this reelection on the railway bonds we hope to eliminate the one hostile vote that was polled at the former election and make it unanimous.

But there is a lesson in these proceedings. The councilmen who are serving the city so ably were elected at a time when no one dreamed that a matter of so much importance would be before this body. Every man interested in the affairs of the city, from Mayor Stewart down the entire list, has proven himself absolutely right in the matters of the greatest importance, and they should be and will be supported in their work by the people of the city.

Resolutions of Condolence

Once more the sad messenger of death has entered our fraternal family and removed from our midst our friend and Brother, William Milliern, whereas the lodge feels deeply the loss of this brother, and the community in which he lived has lost a valuable friend and neighbor and his family a faithful husband and a loving father, therefore be it resolved that this lodge hereby express to the bereaved family and relatives its heartfelt sympathy, and it is our prayer that the healing influence of time may ease the pain of the wound inflicted and enable them to live up with courage until the time comes when they shall meet again in the great beyond.

G. W. Noble, I. L. Ketchum, C. L. Shattuck, Committee, I. O. O. F. Lodge No. 46.

The Vote on Representative

The district vote on joint representative follows:

	Burdick	Forbes	Elder	Smith
Crook	914	794	359	385
Jefferson	561	315	150	185
Lake	278	311	131	188
Klamath	586	575	886	705
Grant	763	470	248	231

Totals 3102 2465 1774 1644

Gave Him a Pointer.

George Ade was once stranded in a small town. He went into the barber's shop to get shaved and endured even unto the end. When the barber had completed his operation the humorist arose and, putting a handkerchief to his face, said gravely:

"Sir, you have missed your vocation. You ought to be an oyster opener."

The Tuxedo Hour by Walt Mason

Tuxedo's bully all the time; it makes the passing hours sublime, and by its soft and gracious curves it soothes the soul and rests the nerves, and fills my bosom, once again, with peace on earth, good will to men. But best I like it when I've fed this face of mine with jam and bread. When I have dined on Irish stew and beans and boiled potatoes, too, and pie and eggs and cheese and tripe, 'tis then I best enjoy my pipe. When from the table I withdraw, I grip my briar with my jaw, and fill it with Tuxedo mild—the pure Tuxedo undefiled—and smoke away in perfect bliss; no pleasure can compare with this. And in the curling smoke I see a world that seemeth good to me. A world that's debonair and gay, its woes and worries done away. The plans that seemed foredoomed to fail, the work that seemed of no avail, now wear the rosy glow of hope, and I endorse all sunshine hope. 'Tis thus in my Tuxedo hour; the world that seemed so dark and dour, is blooming like a rose of spring, and I'm in mood to laugh and sing.

INTERNATIONAL HARVESTER MACHINES

Why the McCormick Mower is Dependable

A BREAKDOWN during the rush time of the haying season often means considerable loss to you. It may delay your cutting so that your hay becomes over-ripe and loses part of its nourishment, or it may prolong the haying season until wet weather destroys a part of its feeding value.

There's mighty little danger of breakdowns when you buy a McCormick mower. It has no unnecessary parts to wear out and give trouble. It has less parts than any other mower. For over eighty years the McCormick has been celebrated for its simplicity and durability. It has given satisfaction to thousands of hay growers. What it has done for others it will do for you. Come in and let's talk it over.
