

LARGE GARDENS ARE PLANTED AT BARNES

POTATOES PUT IN ON HAMPTON BUTTE RANCH

RABID COYOTE TREES A MAN

George Fuller of Lower Bridge Vic-
tim of Rabid Dog—Fishing
in Squaw Creek

BARNES ITEMS

(By Our Regular Correspondent)

Some very welcome rains visited our part of the country the first of the week and rye and other crops are looking fine.

Dixon's brought several hundred head of cattle from the feed ground at Roberts and turned them onto the range here.

A rabid coyote was killed by Walter Fallin last week after chasing Rubin Engstrom some distance and up on a hitching post.

Mrs. Elmira Logan who is quite sick, was taken to Prineville for medical attention last week.

Dr. Tackman and Charlie Birdsong went to Paulina this week. Dentist Tackman to establish his

office there and Mr. Birdsong will bring home a load of rye.

Albert Birdsong was on the Creek bidding old friends good bye before joining the cavalry. He expects to leave next week and will be accompanied by Johnnie Prader and Chas. O'Kelley.

Harry Hackelman is again on the Creek.

Messrs. Dixon and Romberg went to Prineville the first of the week.

Preparations for large gardens are being made by almost everyone in this place where there is room to plant large quantities of potatoes and cabbage as well as all other vegetables.

HAMPTON BUTTE

(By Our Regular Correspondent)

MOLINE Universal Tractor

**As Powerful as 5 Horses
Does as Much Work as 7 Horses
Costs Less than 4 Horses
Requires Less Care than 1 Horse
Less Room than 1 Horse
Eats Only When it Works**

The Ideal Tractor
No other tractor on the market will do such a great variety of work, nor is as correct in design and construction as the Moline-Universal. It makes the horseless farm possible. It pulls the usual 5-horse load—will do as much work as 7 horses, owing to its greater speed and endurance. It can be used for plowing, harrowing, planting, cultivating, haying and harvesting—in fact, all field work, and will deliver 12 horse-power on the belt.

A Real One-Man Outfit
The Moline-Universal is easier to handle than a team of horses, weighs about the same, turns in a 16-foot circle and will back with the implement attached. It is compact, simple, close-coupled, a wonderful puller and carries no dead weight. And best of all, it is operated from the seat of the implement attached. This permits one man to operate both tractor and implement.

Cut the Cost of Horse Labor
The cost of horse labor is almost one-half the gross operating expense on the average farm. A farm horse averages only 3 1/2 hours work a day through the entire year, and tires in six. It costs from 12 to 14 cents per working hour to maintain a horse, and requires 73 minutes a day to care for him, or fourteen ten-hour days a year.

And yet there isn't enough power to plow as deep as scientific methods require; to harrow more frequently, so that organic matter will be utilized, moisture conserved, and a good state of soil tith maintained; to cultivate more frequently, and so harvest at the proper time.

Let us tell you how the Moline-Universal Tractor can reduce the cost of power on your farm. It will pay you.
