ANOTHER MILE STONE

With this issue the Journal starts upon its twenty-second year. Its growth has been steady and sure, and today presents the enviable record of being the oldest paper in this part of the state that has never missed an issue and all these years has been able to get to its increasing family of subscribers with marked regularity.

Looking from the present backward, and reviewing the files of the leg preventative. Journal gives a view of the development of this part of the state that has passed through many stages.

ty-one years has the future of the drawn for Mr. Ross for \$22.65. community appeared so bright, and we candidly believe that the country surrounding Prineville on every side is destined to develop into a powerful and wonderful district, where all will be prosperous and happy.

This is absolutely necessary before any development of the town is justified, and this alone will make the town what it should be.

In the future, as in the past, the prime object of the Journal will be to march in the front rank of the forces that are to make this a grander and better country, and to this end the paper will be dedicated.

Comparing the paper with the exchanges from other communities in the northwest, we believe that we any of our contemporaries, the size survey, if necessary, lay out and of the community considered and we expect to enlarge the scope of the paper as rapidly as the growth of the community will permit.

As the strength and growth of the community is first reflected in give development news that is real road. Now comes this matter on news the first consideration, and we believe that the future of the Journal, like the future of the community, was never brighter.

For better food at less cost

MAZOLA

DUTTER, lard and suet have been used for years for deep frying, sauteing or shortening-because the housewife could find nothing better. Today the Food Administrator asks her to use vegetable oils.

And Mazola, the pure oil from corn holds first place among vegetable oils. It is the ideal medium for sauteing, deep frying, shortening and salad dressings from every standpoint.

Mazola reaches cooking heat long before it smokes-cooks food more quickly and at the same time more thoroughly. This does away with that sogginess and greasiness so prevalent with the old cooking mediums.

And Mazola can be used over and over again because it does not transmit taste or odor from one food to another!

That is what makes it so wonderfully economical.

Get a can of Mazola from your grocer today. Sold in pint, quart, half-gallon and gallon tins-the large sizes give greatest economy. Also ask for the free Mazola Book of Recipes or write us direct.

Your money refunded if Mazola does not give entire satisfaction
