DEMobilIZATION OF TROOPS UNDER WAY

1,790,000 Men in American Army Return to Civil Life Soon.

Washington.—Movement of American troops across the Atlantic has stopped entirely and demobilization of troops in cantonments and camps at home is under way.

Orders have been issued, General March announced, for the gradual demobilization of all troops now in this country.

There are now in the United States 1,790,000 men under arms, General March said. Orders which will result in the immediate demobilization of 200,000 men are already issued and these men will be in their homes in the next two weeks.

When the reduction plan is under full operation, the chief of staff explained, 30,000 men each day will be released from the army.

Regarding the return of troops in France, General March said that the order in which the divisions will be withdrawn is being left to General Pershing. It is the intention of the war department, however, so far as is practicable, to return each division to the locality from which the majority of its men came and to parade the division in adjacent cities, so that the people may have a chance to give fitting welcome.

Demobilization will be in the following order:

- First—Development battalions, 71 in number and comprising 98,199 men.
- Second—Conscientious objectors not under arrest.
- Third—Spruce production division.
- Fourth—Central training schools for officers, with some modifications.
- Fifth—United States guards, now numbering 135,000 men.
- Sixth—Railway units.
- Seventh—Depot brigades.
- Eighth—Replacement units.
- Ninth—Combat divisions.

Orders have been cabled to General Pershing to begin the return at once of all sick and wounded, who can be moved, and convalescents. A steady stream of these men should begin immediately to cross the Atlantic.

GOMPERS SAYS WAGES MUST NOT BE REDUCED

Laredo, Texas.—Samuel Gompers, president of the American Federation of Labor, in the closing hours of the Pan-American Labor Conference here, served formal warning that no general reduction of wages nor increase in working hours after the war would be accepted without a bitter fight by organized labor.

"The American labor movement will co-operate with all other agencies to help in the reconstruction time. Our movement is not to destroy, but to construct. And all may just as well understand now as at any other time that the advantage which the workers of America and of the allied countries have gained and which we hope to extend to the people even of the conquered countries are not going to be taken away from us. And we shall resist in that attempt to the uttermost."

The Pan-American Federation of Labor, the result of the conference of labor delegates from the United States and South American and Central American countries, was created here. Samuel Gompers was chosen president and John Murray of San Antonio vice president of the new labor federation.

BOARD CALLS VOLUNTEERS

5000 Men Needed to Man Ships Carrying Troops.

Washington. — Arrangements for bringing home the troops in France are being worked out rapidly from a shipping point of view, the shipping board announced, in issuing a call for 5000 volunteers to man the ships that will be used for that purpose.

Plans have been formulated whereby the shipping board will furnish crews for the war department transports. Every month, it was said, 400 men will be required as firemen and other hundreds for ratings as sailors, stewards, cooks and coal passers.

Men between 18 and 35 will be accepted without regard for their draft rating or previous experience, and will be put aboard training ships at Boston, San Francisco, Seattle, New Orleans and Cleveland for six weeks' special training. Opportunity will be afforded those who enlist in this service to remain permanently in the merchant marine after peace has been signed and the entire army returned to the states.

Crown Prince Interned in Holland.

Amsterdam.—Frederich Wilhelm Hohenzollern, former German crown prince, has been interned at Swaenem Castle, near Ruremonde.

SWINE USE WASTE PRODUCTS

It is Necessary to Have Number of Pigs on Hand to Consume All of Perishable Feeds.

(Prepared by the United States Department of Agriculture.)
Under ordinary conditions hogs return the largest profit when raised to utilize waste products, and when kept for this purpose alone the number will depend upon the quantity of waste products to be consumed. Skim milk from dairy herds; shattered grain from grain fields; unmarketable products from the truck farm; undigested grain in the droppings of fattening steers, and many other minor wastes on the average farm are examples of foodstuffs which would be wasted were it not for their utilization by the thrifty farmer for the production of pork. In order to utilize some of these products, it is necessary to have a number of pigs on hand for a relatively short time, on account of the perishable nature of these feeds. The rest of the year the fattening pigs and the breeding stock must be maintained upon feed raised expressly for their consumption, and while they are not kept at a loss during this time, still the greatest profit is derived when they are eating their cheap feed in the form of waste products, and the number of hogs which can utilize the waste to the best advantage should be the limiting factor in determining the number of hogs to the farm. On farms in the corn belt where hogs are raised simply to market the corn crop on the hoof, the number is controlled by the amount of corn which can profitably be raised to fatten them.

LADIES!

We have the following bargains to be thankful for

Special counter of Ladies and Childrens Shoes Also Bargains in childrens 2-piece Underwear

We are agents for Munsing Underwear for men, women and children. Our stock is complete in both wool and cotton.
