MONTHLY WAR STAMP QUOTAS FIXED FOR TWELFTH DISTRICT

The Treasury Department has assigned to the Twelfth Federal Reserve District the following monthly quotas to be raised in War Savings Stamps during 1919:

Table with 2 columns: Month and Quota. Rows include January (\$4,200,000), February (4,800,000), March (5,400,000), April (6,000,000), May (6,600,000), June (7,200,000), July (7,800,000), August (8,400,000), September (9,000,000), October (10,800,000), November (12,000,000), December (13,200,000), and Total (\$96,000,000).

The total to be raised throughout the country is \$1,600,000,000.

THE EVOLUTION

The winter just giving away to spring has seen more head of livestock wintered in the Powell Butte country than were formerly owned in many times the area in this part of the State.

Other districts of greater magnitude are not able to winter the work horses necessary for their maintenance. The Bear Creek Butte, for example, would be capable of caring for three times as many head of livestock as are now at Powell Butte, should water be applied to the lands there.

The same rule applies to the lands under the Powell Butte district and under the Ochoco Project, the last mentioned being this year, for the first time, partially irrigated, while the former is yet in a process of development less advanced.

It is becoming more generally recognized each year that this is a livestock country, and the application of water to the arid lands, the increase in numbers of livestock will bring more wealth to the country than has ever been dreamed of by the

most optimistic in the past. The Powell Butte Irrigation district, the Deschutes district and the Ochoco Project will make Crook county the livestock feeding center as well as the geographical center of the state, and these things will be upon us sooner than many expect.

The transportation facilities that are now at hand, feeding advantages and other natural resources, not to overlook the national forests and other ranges, will make thousands of head of excellent livestock possible where a much lesser number of inferior animals were at one time produced.

WITH THE EXCHANGES

Mrs. E. C. Newham and daughter will leave today for Nottingham, England, where they will spend several months with Mrs. Newham's parents. They expect to sail from New York March 24.—Hood River Glacier.

In the five months which have elapsed since September 1, 1918, The Dalles has received a rainfall approximately equal to the annual rainfall for each of the last few years. Conditions in this respect have been remarkable and as a result ranchers are anticipating a record-breaking crop.—The Dalles Chronicle.

Austin Culp and "Turk" Irving opened the fishing season last Sunday by putting in the day on the Deschutes in imitation of Isaac Walton. The day was very mild and the boys had fine luck, each bringing in a string of fine beauties of large size. This is the first effort of the season as far as reported.—Madras Pioneer.

Wallowa county was the second in the State to raise its quota for the Pacific International Livestock Exhibition. This fact is not generally known, but it is true nevertheless.

J. Dobbin received a telegram recently from O. M. Plummer, President of the Exposition, which stated that the fact that Wallowa county raised the money so quickly was one of the biggest helps possible in persuading other parts of the State to come thru.

The city of Portland will match dollar for dollar all money raised for this exposition. Nearly all sections are now in line, and as usual Wallowa county was among the first.—Joseph Herald.

Not how good but how many is one test that can be applied to legislators in order to compare their efficiency in getting measures passed. The member who introduces only a few bills or resolutions often succeeds with every one he introduces, but while he may be the most valuable member, success with a few bills is not a test of efficiency in getting bills passed. There is another class who introduce many measures. To compare the number introduced with the number actually enacted or adopted provides an efficiency test for this class of members.

In quantitative efficiency, Representative Denton G. Burdick of Redmond, heads the list for both houses. He introduced sixteen measures, and of the sixteen, fourteen were enacted or adopted, giving him a percentage of 88 per cent. Senator Gus C. Moser of Portland ran him a close second, as he secured the enactment or adoption of fourteen of seventeen measures, a percentage of 83 per cent.—Oregon Voter.

Powell Butte

WSS NEWS NOTES WSS

A man is operating a Fordson tractor on the O'Callaghan place. It does good work plowing.

Lester Smith visited Charles Charlton, Jr., Sunday.

B. Manceau was a Redmond visitor Monday.

Mrs. George Beckman went to Portland to visit her son, Jesse, who is employed there.

Wm. Young has sold his ranch near Powell Butte station to a new owner whose name we have not been able to learn. This place is all in alfalfa and is a good buy.

The Ross Bussett place that was reported sold last week in these items sold for \$3,000 and consisted of 34 acres.

Geo. Shoberg is seriously ill at his home here. Dr. Hoehch is in attendance.

Mr. and Mrs. C. M. Charlton and their sons, Harold and Charles, Jr., were Bend visitors Monday.

Mr. and Mrs. E. H. Stewart and Mr. and Mrs. Aoy Roberts and daughter, Ina, went to Bend Monday, where the ladies visited while the men attended the Woolgrowers' Convention and banquet.

The following sheepmen of Powell Butte attended the convention and banquet in Bend March 17: Dan Hardman, Burgess and Ed. Moore.

Fife

WSS NEWS NOTES WSS

WESTINGHOUSE AUTOMATIC ELECTRIC RANGES

They are full-sized family cooking ranges for domestic use and have reached their highest perfection in convenience and economy through many years of experimenting and experience. In addition to the cleanliness, safety, saving in food, and general desirability of cooking with electricity, they further have the advantage of saving a great deal of care, trouble, and expense, by the aid of the Westinghouse exclusive economical features of the full automatic control by attached clock and thermostats.

Come in and talk over your stove and fuel troubles with us. Bring in your bread or roasts and cook them on one of our stoves, in this way you can try the stove and it will give us a chance to prove its worth.
