

What you pay out your good money for is cigarette satisfaction—and, my, how you do get it in every puff of Camels!

18 cents a package

**E**XPERTLY blended choice Turkish and choice Domestic tobaccos in Camel cigarettes eliminate bite and free them from any unpleasant cigarettey aftertaste or unpleasant cigarettey odor.

Camels win instant and permanent success with smokers because the blend brings out to the limit the refreshing flavor and delightful mel-

low-mildness of the tobaccos yet retaining the desirable "body." Camels are simply a revelation! You may smoke them without tiring your taste!

For your own satisfaction you must compare Camels with any cigarette in the world at any price. Then, you'll best realize their superior quality and the rare enjoyment they provide.

R. J. REYNOLDS TOBACCO COMPANY, Winston-Salem, N. C.

Although we do not expect much rainfall in Central Oregon during the summer season, it sometimes happens that a good rain covers the country at this season. Such a rain occurred Tuesday night and it was a good one and while hundreds of tons of hay were down and in shock, there will be no loss on this although it may entail some extra labor to properly dry it for stacking. —Redmond Spokesman.

**OLD BELIEFS STILL SURVIVE**

Queer Marriage Customs and Superstitions Extant in Many Parts of the Old World.

It is an old belief that marriage should take place when the moon is waxing and not waning. If it is to be a lucky match, and in many north-country districts a strict inquiry is made as to the state of the moon before the wedding day is fixed, according to a writer in London Answers. In the north, too, no wise bride will ask an odd number of guests to her wedding feast, for an old superstition has it that if this be done one of the guests will die before the year is out.

In the highlands it is taken as a terribly unlucky sign if a dog should run between the bridal pair on their wedding day; while in Derbyshire prospective brides still tell the bees of their wedding and decorate the hives for the occasion. In parts of England and Scotland there exists an ancient custom for which reason is hard to find, by which part of the wedding cake is broken over the head of the bride and the guests scramble for pieces.

None of these marriage manners, however, compare with the Chinese custom which causes bacon and sugar to be hung on the sedan chair of a Chinese bride, in order to keep the demons from molesting her on her wedding journey. The Chinese bride-to-be, too, has to stand in a round, shallow basket while she dresses for the wedding, in order to make her of a good temper and amiable disposition.

**TAKE NO JOY IN PRODUCTION**

Workers in Quarries From Which Famous Carrara Marble is Taken Lead Dull Lives.

Carrara marble is associated with the silent beauty of great cathedrals and monuments. There is none of that dignity about the place of its origin. The little Italian town of Carrara, huddled beside the mountain quarries for which it exists, is a place of confusion and clamor, of men and beasts laboring to supply the world with a commodity.

The Pyrenees mountains have been supplying this marble for centuries. The quarry workmen have for years toiled, as their ancestors before them toiled, to keep up the steady outflow of Carrara marble for the hand of sculptor and architect, and even to make possible that ornament beloved of our grandmothers, the marble-topped table.

For Carrara's laborers, sawing and hammering incessantly, there comes none of the artist's joy of working with a perfect medium. In their treadmill of hard labor the slabs of glistening stone long ago became as dull and uninspiring as so much iron or coal. Blocks of perfect marble are dragged about recklessly and laden on wagons behind long strings of weary oxen.

Carrara exists for the last day of the week. Then, clutching its earnings so hardly won, it hastens to the town's gathering places and for a few intoxicating hours throws off the grip of the quarries.

**Daniel Webster.**

The ponderous strength of his powers strikes us not more forcibly than the broad individuality of the man. Were we unacquainted with the history of his life, we could almost infer it from his works. Everything in his production indicates the character of a person who has struggled fiercely against obstacles, who has developed his faculties by strenuous labor, who has been a keen and active observer of man and nature, and who has been disciplined in the affairs of the world. There is a manly simplicity and clearness in his mind, and a rugged energy in his feelings, which preserve him from all the affectations of literature and society. . . . We never consider him as a mere debater, a mere scholar, or a mere statesman; but as a strong, sturdy man. The school and the college could not fashion him into any foreign shape, because they worked on material too hard to yield easily to conventional molds. — Edwin P. Whipple.

**Invented Pneumatic Caisson.**

William Sooy Smith, builder of the first all-steel bridge in the world and inventor of the pneumatic caisson, was born in Ohio July 22, 1830; graduated at West Point in 1853; resigned from the army, but served during the Civil war, and later became eminent as a civil engineer and bridge builder. His invention of the pneumatic caisson revolutionized deep-river bridge building, and he was the first one to overcome quicksands in making foundations.

He was also a pioneer in moving big buildings and in the construction of sky-scrapers. He was retired from the army with rank of brigadier general and died January 17, 1912—Chicago Tribune.

**Oblivion.**

But the iniquity of oblivion blindly scattereth her poppy, and deals with the memory of men without distinction to merit of perpetuity. Who can but pity the founder of the pyramids? Herodotus lives that burned the temple of Diana, he is almost lost that built it; time hath spared the epitaph of Adrian's horse, confounded that of himself. In vain we compute our felicities by the advantage of our good names, since bad have equal durations; and Thersites is like to live as long as Agamemnon, without the savor of the everlasting register.— Sir Thomas Browne.

**Real Estate**

OF ALL KINDS AND ESPECIALLY LANDS UNDER THE OCHOCO IRRIGATION PROJECT. WE HAVE STOCK RANCHES, DRY FARMS, CITY PROPERTY, UNDEVELOPED LANDS.

**Ochoco Realty Co.**

Prineville, Oregon

**T**HE OCHOCO IRRIGATION PROJECT is one of the few irrigated districts in the Northwest that is free from effects of booms. The values are extremely low considering the facts that there will be an abundance of water, the quality and depth of the soil and the ease with which good, soft, cold well water can be had any place on the district at from 50 to 100 feet. Lands can still be purchased here for as low as \$40 per acre, without the water right. The past season has demonstrated to all those on the project the productive quality of the land and the ease with which it can be cleared, prepared and watered. If you are interested write us NOW.

You will confer a double favor if you will mention The Crook County Journal when writing to advertisers.
