An Invitation to You

THE most desirable thing to bring about in this district is a proper land valuation. In order to gain this objective we must advertise the district outside the boundaries of our own county. In order to advertise the district properly we must have individual pieces of land listed, with description and price at which it can be purchased. All of the advertising will be conducted without cost to the owner of the land. This service is performed by me to further the sale of Ochoco land. If you will call and see me I will explain my simple and safe option which gives the land owner much latitude in disposing of his place. Call for Mr. Russell at the Journal Office.

A vast amount of work now remains to be done which the intervention of war has necessarily delayed and accumulated, and the result is that a very large capital expenditure must be made to make up for the interruptions inevitably due to the war, and to prepare the railroads to serve adequately the increased traffic throughout the country.

Work more— Produce more— Save more—

But we can't continue increasing our production unless we continue increasing our railroad facilities.

The farms, mines and factories cannot increase their output beyond the capacity of the railroads to haul their products.

Railroads are now near the peak of their carrying capacity.

Without railroad expansion—more engines, more cars, more tracks, more terminals—there can be little increase in production.

But this country of ours is going to keep right on growing—and the railroads must grow with it.

To command in the investment markets the flow of new capital to expand railroad facilities—and so increase production—there must be public confidence in the future earning power of railroads.

The nation's business can grow only as fast as the railroads grow.
