Red Brick Popular in Finland.
The chief building materials in the larger towns and trade centers of Finland are red brick and cement. Of late, lime and brick have been commonly used and there are two modern brick works. Cement stones or blocks are also used, but to no great extent. The common material is red brick, made in a great number of larger and smaller brick works. Normally, the more important works produced about 40,000,000 bricks annually. At present the supply is about exhausted.

Being Prejudiced.

Some of the world's greatest men have been prejudiced about most things; and all women make a specialty of prejudices—that is one reason why women are so delightful and so exasperating.—Holbrook Jackson in Today.

Believed to Bar Mosquitoes.

Many plants are popularly believed to keep away mosquitoes, among them being several species of eucalyptus the castor oil plant, the chinaberry tree, etc. Scientific observations have not confirmed the popular idea on this subject.

Important Date in History.

On the tenth of October in 1845, the United States Naval academy at Annapolis was opened. George Bancroft, the historian, who was then secretary of the navy, was largely instrumental in establishing the academy.
