Bring us your rough plans from any plan book and we will prepare complete working plans with instructions where every stick of material is to be used—or we will be glad to loan you our plan books—and by the way—ever notice the house plans the ordinary mail order house—who advertise to save you money—notice the large rooms, averaging (taking from a number of Northwestern Mail Order house Plan Books) "Bed Rooms 9x10 Bath Rooms 5x6, Kitchens 10x9, etc. Notice the fact that the rear porch generally constitutes an uncovered platform with a few steps—a "stoop" mislabeled a porch. Notice the lack of modern conveniences in most of the designs—no kitchen cupboards shown in plan, no medicine cabinet in bath room, no handy built-in features, such as ironing boards, book cases, linen closets, or clothes closets. Or did you think the price quoted included the freight, and were afterwards surprised to learn that you had to dig down in your pocket and pungle up some more good shocks for the railroads; or have you thought that all the material necessary would be furnished, and like nine out of ten, extra material amounting to approximately \$100 had to be purchased to complete the job.

Our Architectural Department, comprising a number of skilled architects, supply us with pictures of houses and all farm buildings.
