

BOUQUETS FROM CADAZOHASIK, N.Y.

A business man who has just come to Oregon to make his home says: "Only in a few sections could business be developed to the present stage and still have so many of the possibilities untouched. My impression of Oregon is first, that you have a wonderful country; second, that you have done wonderful things with it; and third, that you can do still more wonderful things."

Oregon has made rapid strides in the past few years and the possibilities for the future are almost limitless. But it behooves every loyal citizen to get behind Oregon industries and SOOIT.

AUCTIONEER
Telephone Redmond 2522
Powell Butte, Oregon

Air Power.
An Italian inventor has produced a scheme by which vehicles of wheels and carriages and springs are to be propelled by air. According to the accounts, the scheme is to have huge tanks by the wayside holding vast quantities of compressed air. Locomotives and automobiles and tractors and motorcycles can run alongside and connect their tanks to the mother tank, get a lot of compressed air on wheel and run to the next stop.

DELCO-LIGHT
The complete Electric Light and Power Plant
Better living and working conditions attracts labor to the farm.
INLAND AUTO CO.

Does Double Duty.
The weight of the cars descending a South African mine is used to produce power by pulling a cable wound around a drum that drives a generator.

Big Consumption of Molasses.
Approximately 75,000,000 gallons of molasses are used annually in the manufacture of foods.

Brunswick Principles In Fine Tire Making

The reason you are interested in the name on your tire is that it identifies the maker. By knowing the maker you can judge his ideals of manufacture.

The only secret of a super-tire lies in the principles of the maker. His standards decide the quality. For there are no secrets in the tire industry.

What you get depends on what is behind the name on your tire. Brunswick, as you know, means a very old concern, jealous of its good name. Since 1845 the House of Brunswick has been famous the world over for the quality of its products.

The Brunswick Tire is all that you expect—and more. Your first one will be a revelation. You'll agree that you've never known a better. And you'll tell your friends. So spread the news among motorists. The Brunswick is the most welcome tire that ever came to market.

Try one Brunswick Tire. Learn how good a tire can be built. And remember, it costs no more than like-type tires.

Denby!
Motor Trucks

The growing cost of labor, the general improvement in roads everywhere, the increase in construction work, and the growth of long distance cartage, are increasing the necessity for motor trucks of heavy tonnage. Where capacity loads can be maintained, the large truck gives the largest output per man and the lowest ton-mile cost.

The Denby 4-ton truck is designed and built to give the greatest possible results—to make it pay the owner maximum dividends. Nothing has been left undone that would increase its reliability, its road-ability and its economy in fuel, upkeep and maintenance.

Two of these trucks are running 24 hours every day, hauling lumber for Redford Brothers, into Redmond to the Tum-A-Lum yards there. The second of these was delivered last week after the first had been in use a year.

All Denby supplies and parts are now secured immediately from the factory branch, 19th and Davis Streets, Portland, Oregon.

Call on or write us about these trucks, one of the four tons capacity.
