PROFIT FROM BABY BEEVES

Farmer With Pasture Land Could Raise Few Without Great Expense—Grain Needed.

Every farmer who has pasture land could raise a few baby beeves profitably without great expense. In addition to the pasture a silo will be needed and a single crop. It may be advisable in addition to plant soiling crops to supplement the silage and pasture. Some hay should be available and enough grain to finish the calves for market.

LIVE STOCK NOTES

Send the scrub sires to the butcher's block.

The water supply is of paramount importance in raising animals.

Pigs grow very fast when they have pasture and some grain as a supplement.

Beef cattle are able to convert coarse feeds such as hay, stover and silage into meat.

For a general farmer who raises animals and grows diversified crops a silo is almost indispensable.

Beef, pork, milk or mutton can be produced more economically by good pastures than by any other means.

STEADY, AMERICA!

Let Us Work This Out Together

Republicans, It is Up to Us to Elect a Real President This Fall.

He Must Be the Biggest and the Soundest and the Most Effective American We Can Find.

Before Committing Yourself Consider These Facts:

Out of thirteen states, where the contest was between Wood and Johnson for the instruction of delegates to the Republican National Convention, the elections have been decided for Wood in nine.

Total Number of Delegates Pledged to Vote for Wood at Republican National Convention, 321

Since the narrowing down of the field, the situation is generally diagnosed as follows:

A vote for Hoover, for Lowden, or for Poindexter is a vote for Johnson.
