You can't pull the tread off a Thermoid Tire

Eight features that make Thermoid Tires extra strong

1. Thermoid Tires, in many sizes, contain one more ply of fabric than is put in standard tires. For example: 3 1/4 inch tires are built with 5 plies of fabric, and 4 1/4 inch sizes with 7 plies.
2. The fabric in Thermoid Tires is woven from 17/8 ounce long staple Sea Island Cotton.
3. Between each layer of fabric is a special blend of Crolide Compound rubber.
4. The cushion is also made of a special blend of Crolide Compound rubber.
5. The breaker strip is made of specially woven fabric.
6. Between the cushion and the tread there is a different percentage of Crolide.
7. The tread is of Crolide Compound rubber—extra thick, and because of Crolide, tough and resilient.
8. The tread is held firmly in place by a special Thermoid interlocking arrangement of the plies of fabric.

We claim, frankly, this tire will give you more mileage for less money than you've heretofore obtained. The Thermoid guarantee below offers you the opportunity to prove or disprove this claim for yourself without risk.

6000 miles guaranteed (For sizes 7500).
