PRINEVILLE CITY RAILWAY

Time Table No. 5

Effective 12:01 A. M. Sunday, February 29, 1920

Table with columns for Stations, Motor, Mixed, and No. 1/2/3/4/5/6. Lists departure times for Prineville, Wilton, McCallister, O'Neil, and Prineville Jct.

We notice that the city of Norfolk is just launching a campaign for the advertising of the advantages of that city by appointing a committee from the members of their chamber of commerce, with a view to expending \$100,000.

If Prineville would make a move of this kind, with a cash starter of say \$2,500, and use the money judiciously, there is no doubt but what great things could be accomplished. Let's call a meeting of the business fraternity here, and get things going. We have been letting things slip about long enough, and the least we can do for our town and beautiful valley is to go down in our jeans and put her on the map and keep her there.

DON'T WASTE GASOLINE

The popularity of the automobile, the truck and the tractor, has revolutionized modern industry. If anything should happen to cut off the supply of gasoline, the resulting inconvenience, loss and distress would be as great as could be caused by a

general strike on the railways. Hence the fear alone of a shortage is enough to cause the people to give the matter the gravest consideration. Improved processes of cracking the molecules of crude oil have enabled refiners very greatly to increase the yield of gasoline per unit of crude oil. Had this improvement not taken place, an acute condition would long ago have overtaken the automobile industry. The increasing use of gasoline has already run ahead of the supply, and measures must be taken to cut off waste. Every gallon wasted means that much potential power exparated with doing a part of the world's work.

COUNTY COURT PROCEEDINGS

(Continued from page 1, sec. 2)

ROAD FUND

Table listing various road funds and their amounts, including H. C. Nelson, Frank Carter, W. T. Benson, etc.

Champion Meanest Man.

A peculiar case which recently came before a London magistrate was that of a woman who applied for a separation from her husband, whom she denounced as the champion mean man of all England. She complained that her husband during the sugar famine kept his supply in a separate bowl, in which he imprisoned a fly. If the fly was still there when he returned home nobody had tampered with his hoard; if it was not, a lump or two had been taken.

Lawsuit That Lasted 400 Years.

The longest lawsuit on record lasted over 400 years. It was a dispute about some land in Poland, the people interested being the Sobieskis of Oro-iowo and the Sobieskis of Podiowa. It began in the year 1490, and a settlement was arrived at in 1890, the land being then divided among the ten representatives of the original litigants.

Fishing Bed 600 Miles Long.

The famous fishing grounds of Newfoundland, the Grand banks, are 600 miles long and about 200 wide, with a bottom of shifting sand.

FARM DWELLERS ASK FOR BOOKS

Announcement of the "Books for Everybody" Movement Brings Letter Flood.

INFORMATIVE WORKS SOUGHT

Requests for Reading Matter Range From Volume on Drainage to Collins' "Book of the Stars."

The announcement of the entrance of the American Library Association upon the "Books for Everybody" movement and still later news accounts of the activities of the organization along these lines resulted in a widespread appeal from residents of the rural districts of the country for books on farming. Whether the American farmer is simply evidencing his ambition to do a good job better or whether the better crops of his neighbor, who has attended an agricultural college or school, has spurred him on is a matter difficult to determine. But the fact remains that the farmer is asking for books. The great majority of American farmers are either without libraries and book service or they are inadequately served.

One of the points which the American Library Association in its "Books for Everybody" movement is strongly urging is the extension of the county library system in states where enabling acts have been passed—some twenty-one in number—and the proper legislation in others which have not yet taken the step. The system, with its central library and radiating lines to stations in the remotest sections of the county, assures good books to every man, woman and child who cares to reach out a hand and grasp one.

Letters Show Need of Service. The American Library Association is not giving its entire attention to the urban dweller, nor is it neglecting the centers of population for the rural districts and communities. It is, however, unquestionably eager to create a steady flow of informative reading to rural America. That the need for such service exists and that it is anxiously sought is evidenced in every letter of this nature received by state library commissions and by the A. L. A. A few excerpts have been selected because they seem to express most truly the needs of thousands of others.

When Lydia Carlson, whose farm is beyond Mason, Wis., asked for copies of "Productive Farm Crops," "Productive Vegetable Growing" and "Principles of the Practice of Poultry Raising" she echoed the book needs of her neighbors. Then she revealed the fact that her eyes are not always in the furrows by asking for a copy of Collins' "Book of the Stars."

There was a pressing need behind the letter from James Dunn, who lives ten miles from Convent, La., the nearest town, which has a population of only 500 people. He asked for a copy of "Practical Farm Drainage." The task of keeping his acres dry was beyond him. Walter Williams of Osseo, Wis., wanted to know if he could make fuel alcohol from frozen potatoes and spoiled fruits, and if he could, were there any books on the subject. The requests run the whole range of farm operations. Some wish to know how to treat scale, others desire facts on hog raising. Books giving information on crop rotation are in demand.

The American Library Association is raising a \$2,000,000 fund to finance the "Books for Everybody" movement which during the next three years will be carried on in co-operation with existing libraries and library agencies. The money is not being raised through the medium of an intensive drive but through the individual efforts of the librarians, library trustees and friends of libraries.

THREE STOCK FUNDAMENTALS

Feeding, Breeding and Care Are Big Factors in Production of Animals of Quality.

The three fundamentals in live-stock production are feeding, breeding and care, with a strong emphasis on feeding, because good feeding builds the frame work, produces good show animals and makes good records.

DANGER IN STANDING WATER

Sheep and Cattle Should Be Kept Away From Stagnant Pool on Account of Disease Germs.

Standing water should never be allowed to remain where sheep and cattle can get free access to it, as it always has some kind of disease breeding germs in it, and results in the loss of stock occasionally.

PUREBRED HOGS PROFITABLE

Purebred hogs of any of the well known breeds are more profitable than grades. As at least twice as much should be realized from the sale of breeding stock as from market hogs. The purebreds also are generally better feeders than the grades. That is they will make better gains for the feed consumed.

First Annual ROUND UP!

HELD AT INTER-STATE FAIR GROUNDS JULY 2, 3, 4, 1920 PRINEVILLE
