

Three Times Guaranteed

Lee tires are guaranteed without limit by their makers.

They are further guaranteed by the records of actual performance over the roads of this locality and in every other part of the country.

And because all Lee tires in this section are bought from me the responsibility for satisfaction rests with me. I take the risk confidentially, because I know Lee Tires are all I claim for them.

My success depends on your satisfaction.

Whether your preference is for Cord Tires, or Fabric Tires, or the patented, exclusive Lee Puncture Proof, Either Cord or Fabric, I know that you will get more than your money's worth in mileage out of every Lee Tire.

Let me show you one. You'll want it when you see it.

TIMBER PROFITABLE FOR UNUSUAL SPOTS

Many Corners and Slopes Can Be Utilized by Trees.

Locust and Acacia Build Up Poor Soil Through Nitrogen-Gathering Bacteria in Root Nodules—Small Gullies Checked.

(Prepared by the United States Department of Agriculture.)

Timber is essentially a poor-land crop. Steep slopes, poor soil, rocky land, unusual corners, gullied and wooded tracts—all these afford opportunities for growing timber profitably. A careful survey of the average farm will reveal a surprising number of spots of this sort which can be utilized to advantage. If they do not already have trees, planting them with the proper varieties will materially increase the value of the land.

Certain kinds of trees, like the locust and the acacia, build up poor soil through the nitrogen-gathering bacteria in the root nodules, according to the forest service, United States department of agriculture. The soil building power of trees on slopes is a fact which the farmer should not overlook. Steep lands, which have been cleared of timber at much expense, after being cultivated for a few years often become gullied, and the rich lands adjoining are covered with deep deposits of sand. The surest and cheapest method of protecting such slopes is to maintain forests on them. Small gullies can be stopped up by closely packed brush and tree tops, an-

chored by stakes if necessary. Large, open gullies are checked successfully only by planting over the entire gully basin, supplemented by low brush dams across the larger units of the gully.

chored by stakes if necessary. Large, open gullies are checked successfully only by planting over the entire gully basin, supplemented by low brush dams across the larger units of the gully.

INSURE RAPID TREE GROWTH

Sod-Mulch Method is Not Intended for Trees Just Planted—Aim to Conserve Moisture.

The conditions for young trees should be made so favorable that they will start rapidly into growth so that a good, well-ripened growth will be assured before winter. While the sod-mulch method of growing trees gives very good results under certain conditions it is not intended for trees which have just been planted. When the sod-mulch method is adopted it is usually after the trees are well established, when the ground is seeded down to grass and when sod is formed the grass is cut and a pile put about each tree. This kills out the sod about the tree, allows air to penetrate readily and conserves moisture. The drawback to this system is that very often there is not sufficient material grown in the orchard to make enough mulch for each tree, and the sod is not conserved.

ADD FERTILIZER TO MANURE

Yield of Corn Increased by Eleven Bushels Per Acre in Experiment at Ohio Station.

The fact that manure itself is not a balanced plant food, but may, with profit, be reinforced with phosphate, is becoming more and more a matter of general knowledge. At the Ohio experiment station fertilizer added to manure, increased the yield of corn by 11 bushels per acre. The residual effect of the fertilizer increased the wheat crop which followed the corn by five and a half bushels per acre. The clover crop, following the wheat, showed a gain of 1,100 pounds of hay per acre. The fertilizer paid for itself three times.

CURRENT WORM IS HARMFUL

First Brood Appears Early in Spring and They May Be Destroyed by Arsenical Spray.

The imported currant worm is about three-fourths of an inch long, green with yellow tips. They appear first in early spring as soon as the leaves are out, and there is one other brood, and sometimes a third later in the season. They devour the foliage. These are readily destroyed by an arsenical spray or a dusting with an arsenical poison. By catching the first brood there will be little trouble later in the season.

Europe's Potato Crop.

In Europe potatoes are grown of different kinds for different purposes. Certain varieties are raised for cooking and others for starch making and distilling. Over there they have a so-called "stock potato," which is not used for human food at all. It is very large and coarse of texture and is utilized for feeding cattle. The yield to the acre is twice the ordinary, and the tubers being exceedingly rich in starch are great alcohol producers.

CLASSIFIED ADS

FOR SALE

WANTED—Position Cooking on a ranch, enquire Journal Office. 4412p.

SUMMONS

IN THE CIRCUIT COURT OF THE STATE OF OREGON FOR CROOK COUNTY
Jerry Leppard, Plaintiff,
vs.
John T. Leppard and Bernice Leppard, Defendants.

To John T. Leppard and Bernice Leppard, the above named defendants: IN THE NAME OF THE STATE OF OREGON; You are hereby required to appear and answer the complaint filed in the above entitled suit against you on or before the 20th day of August, 1920 and if you fail to so appear and answer or otherwise plead, for want thereof the plaintiff will apply to the above named court for a decree as prayed for in the complaint filed herein, namely: That the contract between said parties described in the complaint herein for the Southeast quarter of Section twelve and the northeast quarter of Section thirteen in township sixteen south of Range sixteen East of Willamette Meridian, in Crook County State of Oregon, be cancelled, forfeited and declared void, and that the defendants and all persons claiming by, through or under them, or either of them, be forever barred and enjoined from claiming or asserting any right or claim under contract to said real estate, and for such other and further relief as to the court may seem equitable in the premises, and for his costs and disbursements herein.

This summons is published pursuant to an order made and entered herein so to do by the Hon. N. G. Wallace, Judge of the County Court for Crook County, State of Oregon, on the 29th day of June, 1920.

LAKE M. BECHTELL, Attorney for Plaintiff.
Residence and Post Office address: Prineville, Oregon.
Published first time July 8th, 1920. 45-46c.

Signs of Consumption.
What are the early symptoms? The patient may have neither cough nor expectoration. He feels tired in the afternoon, and wakes tired in the morning. His appetite is poor, and he begins to lose weight or to stop growing. He is easily exhausted after exercise. Anyone who notices these symptoms in himself should consult a doctor. In any family, rich or poor, in which one member is known to have consumption, all the others should be examined by specialists.

Admiration Goes Out to Him.
We may say a fellow shows had taste in devoting his life to painting or sculpturing, but at the same time most of us have a sneaking admiration for the one who can naturally do things we can't.
Where Old Servants Are Cared For.
A peculiar institution in Stockholm is an "old servants' home," where servants too old to work are given shelter and care in their last days.

When Sleep Will Not Come.
Don't hate the world and kick all night just because you don't happen to go to sleep. It damages your own nervous system, and any tender regard in which your roommate may have held you. Anger eats up energy and is responsible for next morning's very unpleasant day-after feeling. The lack of sleep mattered not at all. If instead of thrashing about viciously you had curled up cozily and day-dreamed, your night might have been salvaged, all might have been well—Exchange.

"Bear this in Mind" says the Good Judge

You not only get complete tobacco satisfaction from a little of the Real Tobacco Chew—But it costs you less. The rich tobacco taste lasts so much longer than the old kind—you don't have to have a fresh chew nearly as often. Any man who uses the Real Tobacco Chew will tell you that.
