He reports good progress in the bridge construction with the forms completed for the piers and concrete work started on Saturday.

Remarkable Menu. A group of New Yorkers dined the other day on some curious dishes. They were octopus soup, rook cod from New Zealand, roast breast of penguin, peas from Argentina, sea elephant cutlets and salads made from endives grown in Tasmania. All the fish and meats served at the meal had been frozen two years before in the south seas and were brought north to show how great and how varied a food supply the antarctic continent can furnish.—Youth's Companion.

May Day in Scotland. In Scotland May day was long known as Beltane. "Beltane" is a corruption of Bael Tine, and the ancient May day ceremonies which were observed in Scotland until not so many years ago were survivals of the old Bael or fire worship, which in former days held sway over the greater part of the Eastern hemisphere. The ancient ceremonies involved the burning of bonfires, the drawing of lots for sacrifice, and even a mock simulacrum of the sacrifice itself.

Inventor of the Income Tax. The real inventor of our modern income tax was one of those unbusinesslike dons of Oxbridge, at whom it has long been the custom to scoff for being "children" in financial affairs. This irregular impost was suggested to Pitt by Dr. Henry Beeke, a fellow of Oriel and professor of modern history at Oxford, who afterward constantly assisted Vansittart with the budget during that statesman's long tenure of the chancellorship of the exchequer.—London Times.

Honesty. Honesty is not the best policy. It isn't any kind of policy. It's a virtue practiced for its own sake without regard for profits. Those who refrain from stealing because thieves end in jail are not honest. They are merely discreet.—Robert Quillen in Saturday Evening Post.

Red Ink Stains. To remove red ink stains from table linen spread freshly made mustard over the stain and leave about one-half hour. Then sponge off and all trace of ink will have gone.

AEROPLANE HERE AGAIN FOR ONLY A FEW DAYS

The airplane is again in Prineville and will give the people of this vicinity an opportunity to enjoy a ride in the clouds from now until Saturday evening. This is perhaps the last time that Prineville will have a visit from the birdmen this year, so it behooves the ambitious to get busy before it is too late.

REBEKAH CONVENTION HELD TUESDAY AT BEND

The Rebekah Convention for this district was held in Bend Tuesday afternoon and evening, and a large attendance from nearly every lodge in Central Oregon was present.

Mrs. Ethel Fletcher of Salem, the president of the Rebekah Assembly, attended the convention, and paid the Bend lodge an official visit. Mrs. Fletcher expressed herself as being very well pleased with the work of the order in Central Oregon, as evidenced by the reports of the various committees, and gave many helpful suggestions whereby the order might benefit and prosper in the coming year.

Bend Rebekah Lodge exemplified the work of the order with initiation in the evening. The manner in which Bend interprets the Rebekah Degree is very beautiful, and the work was given practically without a ritual in sight. This lodge reported the largest increase in membership, over 60 having been initiated during the last year.

Mrs. Fletcher and M. R. Biggs of Prineville both gave very interesting talks, complimenting the Bend lodge, and in regard to the principles of the order.

A very delicious banquet was served all present at the close of the session.

Those who attended from Prineville were: M. R. Biggs, Mrs. E. T. Shattuck, Hattie Goodnight, Mrs. Sam Babcock, Mrs. Chors, Ilda Chors, Mrs. Young, Martha Gillett, Gail Reeves, Jessie Forrester and Mabel Connelly.

Wonderful Scales.

What is claimed to be the smallest balance of precision used for important work is that of the United States bureau of standards, a little more than a foot tall in its glass case. It takes loads up to two grams; and is accurate to one-thousandth of a milligram, or about .000015 of a grain. It will weigh the ink of a signature. The case is dust-proof, and to avoid influence of the weigher's body heat the weights on the scale may be manipulated by a long rod from another room.

Dimensions of a Million.

A way of realizing the meaning of a million, almost as good as counting chestnut blossoms, is to think of what it means in time. Few people realize that there are less than a million days in the whole Christian era; in fact, if we count back a million days from 1920 we come to a date well before the founding of Rome, while a million hours would take us back almost to the battle of Trafalgar.

Good Advice.

"Crosby," the veteran correspondent of the Downs News, gives this bit of free medical advice to boys and girls who are troubled with sore lips: "When I was a boy I always had sore lips. One day an old woman told me to turn my bread butter side down when I ate—every bite I ate for three weeks, I followed her advice, and I have never had a sore lip from that day to this. It doesn't cost a penny for this drug."

Jud Tunkins.

Jud Tunkins says many a young man with a fine future has used most of it up admiring its possibilities.

"Great Expectations."

Should people, it is asked, sleep at the theater? No. They should hardly expect to get bored and lodging as well.—Brooklyn Eagle.
