

STOCKMEN FAVOR PACKING PLANT PLAN

Plans were discussed at the meeting of local stockmen at the court Saturday evening provide for the erection of a packing plant in this city during the next year.

An exhaustive discussion of the methods by which prices on beef and mutton products are regulated, kept far below where the retail prices indicate they should be, the fact that the grower has nothing to say about the amount he is to receive for his fat stuff, while the packer puts on the price that is to be paid for the killers, then sets the price on the meat products that they sell, even going so far as to tell the retailer how much he shall charge each day for the retail cuts of meat it was alleged by one grower present, combine in a situation that means ruin for the livestock industry unless it can be combated in an effective manner.

Because of the fact that this is a livestock country, the very life of the community itself depends on the success of the livestock industry, which should make every individual in the territory a supporter of any plan that will benefit all stockmen and everyone else, it was pointed out.

Two delegates, G. W. Russell, president of the local organization, and W. I. Diahman, a prominent cattleman, were selected to attend the big stockmen's meeting at Salt Lake, and will leave for that place on Saturday.

They will return in time for a meeting of stockmen, called for the court house, here December 11, at which every stockman is urged to be present.

At this meeting a report of plans for the local plant will be discussed further, and also discussion of the action at Salt Lake City, where action is to be taken for the stockmen and their industry.

Do not forget to attend the December 11 meeting.

HENRY FORD PLANS TECHNICAL INSTITUTE

Freshmen Will Get Scholarship of Forty Cents an Hour.

Henry Ford has announced his intention of open a technical college in Detroit. It will be known as the Ford Institute of Technology, and its curriculum will embrace those subjects which lead to degrees in mechanical, electrical and chemical engineering. Outstanding is Mr. Ford's decision to grant monetary scholarships to all students; freshmen will receive scholarships of approximately \$20.00 a week. Rates for advanced students have not yet been announced.

Like all Ford ventures, the Institute presents its own deviation from customary systems. The school year is divided into two parts, half of the time being spent in class, lecture rooms and laboratories, and half in the shops doing actual work under actual working conditions. This regimen is so divided that the students work alternates every two weeks.

The reason for this class-to-shop and shop-to-class method is given in the school announcement: "The Ford Institute of Technology proposes to give that education which is life, directed by purpose, in order that there need be no 'period of adjustment' after graduation. Theoretical work is supplemented by experience in practice, and by contact with actual conditions in life. Commercial standards relative to methods and cost of manufacture, shop organization, accuracy, production, and time, are stressed."

"The laboratory at the disposal of students" continues the Ford announcement, "includes the Highland Park Plant, the Tractor Plant and Blast Furnaces at River Rouge, a railroad, a mine, a lumber camp and many subsidiary operations. Every phase of engineering is covered, not by a meager equipment for demon-

stration and experimental purposes, but by millions of dollars' worth of machinery and apparatus—all the latest word in scientific development."

Although the Ford Institute was announced but a short time ago, more than 1000 applications have already been received. Every state in the Union has had its applicant; and many letters have come from Canada. Henry Ford is taking a personal interest in the new school.

KEEPING STEP WITH THE TREND OF PRICES

Prices on many utilities appear to be decreasing steadily. A ten percent increase in the size of loaves of bread, the second such increase in two weeks without an accompanying increase in price, was announced last week by 12 of the leading bakers of Kansas City. The increase, according to a statement, is a move on the part of the bakers to "keep step with the general trend in prices."

Prices of food served in Child's restaurants throughout the country were reduced from 11 to 28 percent this week. This announcement was made in New York by A. W. Riley, head of the government's flying squadron of profiteer hunters. The 10 cent cup of coffee will, however remain.

An average reduction of 10 percent in food prices was announced last week by several large hotels of New York City. The number of items on the menus on which decreases were made vary from 16 in one large hotel to 172 in another. The new prices were agreed upon as a result of investigations by Federal agents.

A reduction of 3 1-3 percent in the wholesale price of clothing was announced last week by one of the largest clothing manufacturing concerns of Rochester, N. Y. The reduction was made effective from November 1, and applies to suits and

overcoats. It is said the reduction, which is in addition to the usual cash discount of seven percent, represents a cut from \$33, the opening fall wholesale price, to approximately \$20. Men's clothing for immediate delivery were offered at prices 10 to 50 per cent below former wholesale prices. Goods for spring and summer delivery were shown at prices 10 to 33 1-3 per cent under those of a year ago. Men's shirts and similar articles were shown at greatly reduced prices.

The news of such sweeping reductions in prices is encouraging to the general public, and as soon as the local merchants have had an opportunity to adjust their prices accordingly will aid materially in helping to solve the high cost of living.—Lake County Examiner.

EMBARRASSED HER

A lady in a near by town, no matter which one, went to a grocery store for a peck of apples, taking what she supposed to be a freshly laundered flour sack. She held the sack while the clerk poured the apples in and they came streaming out the other end. On examination, it was found there were two holes in the bottom, both trimmed and embroidered. The young man gave up the ghost and the lady went home and sent a small boy for the apples with a basket.—Ex.

THE FUNNY THINGS WE DO

Yes, there are some things we do that are funny and absurd. For instance, we throw away ashes and buy soap. We raise dogs and buy hogs. We grow weeds and buy vegetables and brooms. We catch fish with a four-dollar rod. We build school houses and send our children away from home to be educated. And we send our boys out with a \$40 gun and a \$100 dog to hunt a ten-cent jackrabbit, and he don't get the rabbit.

KEEP FISHING

Suppose the fish don't bite at first
What be yer goin' to dew?
Chuch down yewr pole, throw out yewr bair
An' say yewr fishin' threw?
Uv course yew hain't; yew're goin' to fish,
An' fish, an' fish, an' wait
Until yew've ketched yewr basket full
An' used up all yewr bait,
Suppose success don't come at first,
What be yew goin' tur dew?
Throw up ther sponge an' kick yewrself,
An' go tur feelin' blew?
Uv course yew hain't, yewr goin' tew fish,
An' bait, an' bait agin;
Bimeby success will bite yewr hook,
An' yew'l pull him in. —Ex.

JOHNSON CREEK HAS CLEAN-UP.

Johnson Creek resembled a beehive last Sunday, with all the members buzzing around in a general clean-up. Sagebrush on vacant lots was grubbed up and burned together with trash of every description including old fences, until all that part of town was spick and clean. Board walks were erected to supply the growing needs of the new houses lately built.

Ray Schee was chief promoter for the day, with Asa Battles for his assistant, and Tom Quinn was chief herder. Lake Bechtell, Bill Ireland, Joe Gerardo and Ralph Porfly were hard workers, and children of the neighborhood brought up the rear. The Johnsonites now challenge any other part of town to show as good a record in the way of clean-up and improvement.

The Reckoning.

It is hard to convince the defeated candidate that it is better to have run and lost than never to have run at all after he has balanced his bank book.—Yonkers Statesman

THANKSGIVING BALL WAS WELL ATTENDED.

The Thanksgiving night benefit dance for the Legion building fund, given by the Red Cross girls, was well patronized by local people, the dancing floor being comfortably filled with dancers.

The decorations of gold and green and grain together with flags, were designed and put up by the girls, and were very much noticed for the cleverness and originality.

Another feature of the evening was the lighting for the moonlight dances, a large round moon, with the Legion emblem reproduced on the face.

Just before supper, Miss Tona Cornett gave an exhibition Spanish dance in costume, which proved very effective. The hall was darkened, and the spotlight played upon Miss Cornett as she danced, heightening the effect.

The girls acted as floor managers for the evening, and assisted everybody to have a very good time.

RAIN REQUIRES FOR Tea Growth.
Tea requires a rainfall of 60 inches and irrigation will not serve in lieu thereof, as a somewhat humid atmosphere is needed.

NOTICE FOR PUBLICATION

DEPARTMENT OF THE INTERIOR, U. S. Land Office at The Dalles, Oregon, November 18, 1920.

Notice is hereby given that WILLIAM C. HARLAN, of Brothers, Oregon, who on February 15, 1917, made Homestead 015448 and on August 15, 1917, Add. H. E. No. 018147, for W 1/4, Section 35, Township 18-South, Range 17-East, Willamette Meridian, has filed notice of intention to make three-year Proof, to establish claim to the land above described, before H. C. Ellis, U. S. Commissioner, at Bend, Oregon, on the 8th day of January, 1921.

Claimant names as witnesses: Samuel E. Lochery, Samuel W. Merrill, James W. Orsley, and John H. Fisch, all of Brothers, Oregon.

H. FRANK WOODCOCK, Register. 11-18-20

WE GUARANTEE \$25.00 PER WEEK full time or 75c per hour spare time selling Guaranteed Holyery. Agents making \$75.00 to \$100.00 per week. Good Holyery is an absolute necessity, you can sell it easily and make large profits. Experience unnecessary. EAGLE ROBBERT COMPANY, DARTY, PA. 8-17

Ford car production the coming year will require over

	634,375 tons of steel,
	250,000 tons of coal for power, gas and heat,
Quality	10,000,000 gallons of fuel oil for heat treating steel,
Production	172,500,000 feet of copper tubing for radiators,
Makes	81,875,000 square feet of rubber cloth for tops,
Ford	66,725,000 square feet of steel for fenders and guards,
Prices	12,400,000 square feet of galvanized metal for gas tanks,
Possible	7,287,500 square feet of glass for windshields,
	5,000,000 wheels and 5,000,000 tires,
	3,750,000 lamps,
	43,000 miles of wire for magnetos.

These figures, covering only a few items, show what Ford production of 1,250,000 cars means—in purchasing power and in efficiency of handling methods.

Regardless of marvelous efficiency in the past, Ford production methods must be revolutionized the coming year to make the new cut prices possible. But Mr. Ford CUTS THE PRICE FIRST, and then makes that cut possible by increasing efficiency and eliminating waste.

You get the benefit. Take advantage of what the Ford production methods offer you and get your Ford car now.
