THE PROJECT BOOSTER

(By Rev. R. M. M. Gallaher)
We praise the Pioneer
For making this a paradise:
The herds of sheep and cattle
Gave the multitudes a rise;
The bunch grass on the hillsides
And the meadows in the vale,
Maintained the Pioneer.

CHORUS
Booster, Booster, be a Booster;
Booster, Booster, be a Booster.
Booster, Booster, be a Booster,
Boost the sturdy Pioneer.

But now we've passed the station,
Where we have the open range;
The rancher must diversify,
And boost along the Grange;
We'll convert the plains into a farm
With water make the change,
To Boost the Produce on.

CHORUS
There are knockers on the corners,
There are knockers in the hills;
We will put them on the hummer
With a thousand stinging thrills.
We will fill their place with Boosters,
We will make the Project show—
While we Boost The Ochoco.

CHORUS
With canals upon the ridges,
And alfalfa in the fields,
We will beautify the homesteads
And produce abundant yields.
With cows and hogs to help us
We'll put dollars in our kiels,
While we push the work along.

CHORUS
Then we sing a strain for Upton,
And we hum a line for Biggs;
We will advertise the features
Which will make the tourist dig;
While the roads will honor Wallace
And the Dam will stand for Rea,
While the Railroad rolls along.

A PARODY

An exchange has paraphrased the Ford as follows:
"The Ford is my chariot, I shall not want. It maketh me lie down in wet places, it destroyeth my soul. It leadeth me into deep waters, it leadeth me into the paths of ridicule for its name sake. It prepareth a break down for me in the presence of mine enemies. It will fear more evil when it's with me, its rods and its shafts discomfort me. It anoints my face with oil, its water boileth over. Surely to goodness if Lizzie follows me all the days of my life, I shall dwell in the house of nuts forever.—Ex.

WEEDS INTERFERE IN THE CANALS

The weed nuisance is the greatest difficulty now confronting the water users under the Ochoco Project, and it is the principal cause of breaks and poor water service during the irrigation season.
Up to the present time it has cost the district about \$3000 for cleaning weeds alone and unless more co-operation is had from the farmers it will perhaps cost that much more. As fast as the employees of the district clean out the canals and laterals the weeds from the adjoining fields blow in and fill them up again. When there is water in the canals, weeds that blow in float down the canal and nearly always lodge in the fences that cross the canals or in the head gates or other structures, in a very short time there will be

LUCKY STRIKE
cigarette

a large jam of weeds, and about the same time the farmer using the water below will note that his head of water is falling and will sometimes stop altogether. He then will start to cuss the ditch rider and the irrigation district for the rotten service, not stopping to consider that the matter is almost impossible for the ditch riders to control. This weed condition will either check the water high enough to overflow the banks and cause a break in the ditch or will flood out the water-user above the weed jam.

To reduce this nuisance to a minimum, it is suggested that the farmers under the project co-operate with the district and get rid of the weeds in the fields, and when weeds are seen in the laterals that run through their land, to take a few moments time, pull them out and burn them when dry. If each water user would take as little as one hour's time during the week cleaning up and burn-

ing weeds on his own place, in a surprisingly short time the whole project would be free from the nuisance, to say nothing of a saving of several thousand dollars in taxes each year, cleaner and better grain and alfalfa and better water service.

There is a law in this state governing the control of weeds and if results cannot be obtained otherwise the County Court and the Irrigation District may be forced to co-operate and put the measure into effect. The subject has been discussed by the Court and the District and if put in effect will mean that each ditch rider in the employ of the district will be appointed a weed inspector. He will have the authority to notify any land owner to clean up and burn the weeds on his property, if same is not done within 20 days after notice has been served he will have the authority to have the work done and the cost will be charged up against the property concerned and will be a lien on the property.

quintessence.
The ancient Greeks, like modern chemists, said there were four elements or forms in which matter could exist—fire, air, water, and earth. The Pythagoreans added a fifth, which they called ether, more subtle and pure than fire. This element, which flew upwards at creation, and out of which the stars were made, was called the fifth essence, hence quintessence or "fifth-essence" means the most subtle extract of a body that can be prepared.

Human Gambling Tools.
A set of small dice supposed to have been cut from the molar teeth of a notorious French criminal and professional gambler, who died by the guillotine, together with a dice-box made from a toughened piece of his skin, was one of the curios disposed of by a Paris curio dealer.

Conducted 28,000 Inquests.
A coroner in one of the London boroughs has retired with a record, having conducted 28,000 inquests during his 26 years of service.

The Dutch Laundry
It will pay you to have your washings done good—not ruined, not too much blueing, but nice and white. I am looking for more clothes—ruff drying, ironing and wet wash. You will find that my prices are reasonable. Blankets washed 3 for \$1.00. No fading, but they look like new. We get the washings and return it nice and clean at all hours, every day in the week.
