

Helping to Keep OREGON Going Forward

**CLARK, KENDALL & CO., Inc. Have Done Their 'Bit'
to Make the Ochoco Irrigation a Successful Project**

BEHIND every great undertaking there must needs be the financial wherewithal to meet the cost. When the bonds were issued for the Ochoco Irrigation District project, Clark, Kendall & Co., Inc., of Portland, underwrote three issues amounting to \$1,250,000 [ONE AND ONE-QUARTER MILLION] and through their widespread marketing connections placed these bonds in the hands of investors in all parts of the country.

A great many purchasers of the Ochoco Bonds were Oregonians who not only had an interest in securing conservative investment for their funds, but who had the confidence and foresight to place that investment where it would help build up Oregon by opening to settlement and increasing agricultural opportunities in Oregon.

Clark, Kendall & Co. Inc., extend their congratulations to the pioneers whose initiative conceived the great Ochoco Irrigation District project and whose perseverance made that 'dream' become reality. May their prosperity be equal to their progressiveness.
