

# How MICHELIN

has overcome the commonest causes of tire trouble

## TREAD CUTS

NUMBER

1

When a tire is cut, dirt and moisture work in between the layers of cords weakening the tire and causing decay.

In this construction every cord is impregnated with rubber, the tire being a single mass that offers unique protection against inroads of dirt and moisture yet is flexible in the extreme. Michelin Tires offer maximum protection against such injuries. The exceptional toughness and thickness of the Michelin tread prevent cuts from penetrating; and if a cut does penetrate the injury is minimized by the Michelin body-construction. Let us show you a Michelin cord.

Mammoth Cave in 1812. Visitors to the Mammoth cave in Kentucky, whose attention is attracted by the brilliant arches of crystal, by the amazing echoes, and by the diversity of the rock formation, may not remember that this particular locality was once of great practical benefit to the country. For it was by reason of its immense deposits of saltpeter, used in the manufacture of gunpowder during the War of 1812, that the spot was first given notoriety.

**Explanation of Name "Canada."**  
There are various theories as to how Canada came to be so called, one which meets with wide approval is that the word Canada is derived from an Indian word, "Kannatha," meaning a village or collection of huts, and it is supposed that Jacques Cartier, hearing this word used by the Indians with reference to their settlements, mistook its meaning, and applied it to the whole country.

**Novel "Ferris Wheel."**  
The ferris wheel of Baghdad is built of long poles attached to a heavy long crosspiece; on the ends of the poles rude wooden chairs are placed, in which the lovers of excitement are strapped, while by man power the revolution is made, the rider getting a wild thrill of the real Ferris wheel.

**The Home Life.**  
Economics changes man's activities. As you change a man's activities you change his way of living, and as you change his environment you change his state of mind. Precept and injunction do not perceptibly affect men; but food, water, air, clothing, shelter, pictures, books, music, will and do affect them.—Exchange.

**Lines to Be Remembered.**  
Many a shaft at random sent, finds mark the archer little meant; and many a word, at random spoken, may soothe or wound a heart that's broken.—Walter Scott.

**Where the Fox is Sacred.**  
In Japanese mythology the fox is represented as having been born first into this world, and even now when a fox is seen he is regarded by most of the more humble classes as a messenger from heaven.

**Checkers Played by the Ancients.**  
The game of checkers is very ancient, being known to the Egyptians, Greeks and Romans. It was played in Europe in the Sixteenth century. An old form of checkers is known in China as "the game of circumvention."

## The Bank of Prineville

CAPITAL STOCK \$55,000.00

THERE is no section of Oregon so full of latent resources as Crook County and adjacent territory. We have abundant faith in its future growth, and purpose to lend every assistance in its upbuilding and development. You can help in this development plan by opening an account with us. There are many other ways we can be of real service to you. Come in and let us get acquainted and talk it over.

# Who says that "bargain" tires are what the people want

MOST everybody knows the easy-going sort of man who never takes a tire seriously until he gets a blow-out.

How long he will resist universal tire education is a question.

But this is sure—

More people are finding out every day that between leaving things to luck and getting *real economy* there is a big difference.

Many a car-owner has come to U. S. Tires because he couldn't afford to keep on *paying* that difference.

Probably seven out of ten users of U. S. Tires came to them only after they'd had enough of "discounts", "bargain offers", "clearance sales of surplus stocks" and other similar appeals.

They have found *economy*—and they stick to it.

They pay a *net price*—not "something off list" that may not mean anything in the first place.

They get *fresh, live tires, being made and shipped* while this message is being written.

No matter where they live there's a nearby U. S. Dealer with his nearby U. S. Factory Branch.

U. S. Tires keep *moving*.

No opportunity to get old and dried out. No shifting here and there trying to find a market.

Every U. S. Tire a *good tire*, wherever you find it anywhere in the country.

Because the U. S. policy is a *good policy* that serves the car-owner all the time.

Doing the very best for him that human good faith can do.

**THE U. S. CHAIN TREAD**

One of the few tires of which it may be said that they deliver economy year in and year out and tire after tire.

The U. S. Chain Tread gives sufficient traction on all ordinary road surfaces. It is probably the handsomest, and by all odds the most popular, of the whole U. S. Fabric Tire line.
