We know it will make every member of the Dead Game Sport Club feel good when they learn that the ponds on their preserve at Gattos's farm were literally covered with ducks, mostly widgeon, last Saturday. "Just wait until spring and you will see the high water of '94 again," said an old resident the other day. "More snow has fallen this winter than for years, and unless I miss my guess there will be something doing along the water line when it begins to melt. Imagine launches running about the business district on Third street in Portland, and a barge loading at Tenth and Glisen streets, and you will understand what the Willamette does when it gets on a rampage."

H. L. Powers, of Hartman, Thompson & Powers: Few people comprehend the improvements made in the vicinity of St. Johns during the past three years. Four years ago the whole upper portion of the hill was covered with brush and stumps. I came down here and looked over the prospect and decided to build a dozen houses. Some of my acquaintances declared I was insane. But I built them—an even dozen of them. And I have no cause for regrets. No one would build here at that time because water for culinary purposes could not be obtained. Mr. Scott had the only first class well here, and kept a 10,000-gallon tank full to supply the community. Our first months receipts after completing the water system amounted to \$50. This amount seemed rather insignificant when we compared it to the outlay.

"I hope to see the time," said a former motorman, "when the man on the front end of a street car will get 50 cents more per day than the man on the rear end. Besides this I believe every man who applies for a head-end job should be compelled to take examination for the purpose of seeing whether he is qualified. A man operating an electric car has to be far more cautious than a locomotive engineer, is exposed to as much danger and should be subjected to the same test as to his qualifications as the man who runs the railroad engine. If this was done the public would feel safer, the men would be better pleased and it would be a good thing all around. It will not be long, however, until such a thing will be demanded by the public."
