Electric Light and Power

A talk with us will convince you that ELECTRIC LIGHT is the only light you can afford to use in your home, or put in the house you are building. Your property will rent more readily, will pay a higher income, and attract a better class of tenants. IF IT IS EQUIPPED WITH ELECTRIC LIGHT.

The use of ELECTRIC POWER means: Great saving in machinery and initial cost of plant, high ECONOMY in cost of operation, and an INTENSIFIED PRODUCTION possible only where ELECTRICITY is used.

Advantages in the cost of producing power enables us to make terms exceptionally favorable to manufacturers, and to furnish unequalled service at lowest rates.
