Albany Democrat: The papers of the country generally were against Hearst, charging yellow journalism as the reason for it. And yet it is a peculiar fact that the same papers ape the Examiner and other Hearst papers in a great many things, in fact almost everything but the high moral editorials along temperance and social lines. Papers which make fun of the Hearst papers for their red ink proclivities now themselves have red ink and yellow ink and all the colored inks needed. It just makes a difference whose nose is red The truth is some of the yellowest papers at heart are those which are continually yelling yellow about their neighbors.

State Printer Baker's offer of \$20, ooo a year to Duniway, who was recently elected to that office, for the privilege of managing the state printery and keeping the proceeds derived therefrom, proves couchi sively that there is too much graft connected with that office under the skillful manipulation of Mr. Baker. When Mr. Duniway properly refused the bribe and had obligated himself in the purchase of a new printing plant, Mr. Baker offered to donate his plant to the state. It seems hard for some people to let go of the public teat before they have sucked the thing dry. A little investigation into the manner of conducting the state printing office might prove beneficial to the commonwealth's exchequer. .

In an address at the People's Forum on "The Legal Pursuit of Happiness' last Sunday night, St. Johns' old friend Lawyer McGarry got after the money power in true McGarry style. To curb avarice and greed he would tax the men of millions out of existence. His plan is to begin with a small rate on an accumulation of \$5,000 and progressively increase to 5 per cent at \$1,000,000; to roper cent at \$2,000,-000; to 40 per cent at \$4,000 000; and to 80 per cent at \$8,000,000. "To say that the American people | 11 are a happy and contented people is to insult our common intelligence.' said the man who helped make St. Johns famous. "We are the softest and most gullible race of hero worshipers and incompetents that 12 has ever, in a given space of time, occupied the earth. Our ideas of morality and national honor are absorbed from those who plunder the country, impoverish the people and | 13 defy the government. Money has grown to be the real test of decency, and the crime of usury has been made a rule of governmental policy."
