MAKE SALESMEN OF YOUR WINDOWS AFTER DARK

A store may shut its doors at sunset, but if its show windows are Electric Lighted and attractively dressed they are doing as effective soliciting for the next day's business as a corps of sales people.

Up-to-date stores nowadays consider window lighting a necessity, whether they remain open after dark or not. Competition forces modern methods. Is your store "SHUT UP" after sunset in the old style or in the new?

There is no known illuminant which will light a shop window as effectively, handsomely and satisfactorily as Electric Light. Fabrics are shown in their true colors and every little detail is brought out in true proportion to its surroundings.

If your window is not Electrically Lighted you are throwing away chances for increasing your business only measured by the number of people that pass your store after dark.

Based on our new scale of Reduced Rates for current on Meter basis, Electric Light is not an expense—it is an ECONOMY.
