

WE ARE STILL SELLING STOVES!

Our first shipment of 65 heating stoves is exhausted, except a few odd sizes, while in some styles—namely, our "Cheerful" line—we have in the third shipment since the heater season has opened. This same "Cheerful" heater is the best wood stove in St. Johns; has heavy cast bottom and sectional cast lining, spark shield over damper; large, close fitting door provided with smoke curtain that prevents smoke from issuing into the room when fuel is put in.

Our line of Crown and Cascade Ranges, all made by Niagara Stove Co., Buffalo, are going out so fast we can scarcely keep a line of samples on our floor. They are winners. Let us show them to you and give you prices.

Let us sell you a wire door mat. Easy to clean and will last a lifetime.

Full line of paints, oils, all kinds of inside varnishes, etc. In fact, our stock includes everything found in a first-class hardware store.

MAKE SALESMEN OF YOUR WINDOWS AFTER DARK

A store may shut its doors at sunset, but if its show windows are Electric Lighted and attractively dressed they are doing as effective soliciting for the next day's business as a corps of sales people.

Up-to-date stores nowadays consider window lighting a necessity, whether they remain open after dark or not. Competition forces modern methods. Is your store "SHUT UP" after sunset in the old style or in the new?

There is no known illuminant which will light a shop window as effectively, handsomely and satisfactorily as Electric Light. Fabrics are shown in their true colors and every little detail is brought out in true proportion to its surroundings.

If your window is not Electrically Lighted you are throwing away chances for increasing your business only measured by the number of people that pass your store after dark.

Based on our new scale of Reduced Rates for current on Meter basis, Electric Light is not an expense—it is an ECONOMY.

Scarcity of cars is causing considerable anxiety among lumber shippers throughout the northwest. Several mills have been forced to shut down in consequence and many more are only running half the time. The outlook is rather blue, unless the railroad companies can in some manner come to their relief with more cars.

There is not much money in raising stock for the farmers in eastern Oregon. Last week the writer saw twelve head of cattle sold for \$16 per head. In the lot were two cows, one calf and nine three-year-old steers. Every one of the critters were hog fat—and wheat fed at that. The steers would average about 1,000 pounds each and the cows a trifle more.

A report is current to the effect that a high level bridge is proposed across the Willamette at this point. It is the intention to build so that ships with the highest masts may pass under it without interference. The eastern end of the structure is located on Philadelphia, the widest street in the city. The promoters say the river will be spanned at this point within five years.

The market inspector of Portland accuses a Portland business house of selling cold storage turkeys over a year old for Thanksgiving. The fowls are said to have become black with age and totally unfit for food. We have often wondered how the price of poultry always hangs around the 25 cent mark. And why doesn't the market inspector give the name of this particular firm that sells decayed meat?

The trial of Orlando S. Murray for the murder of Lincoln C. Whitney is scheduled for the 10th inst. in the district court at Portland. Whatever the outcome may be, the fact will always remain that young Murray did everything he could do to secure justice through the officials, and failing to get it, took the law into his own hands. The grand jury would have done well to have looked into the official acts of the persons elected to care of such affairs as the Murray-Lincoln episode.

The Portland Meat Co., the new wholesale meat concern that had been supplying the local markets with meat for the past month, was purchased by the Pacific States Meat Co., last Monday. Those at the head of the Portland Meat Co. understood their business, and were establishing a fine trade.

Owing to the fact that it costs money to buy hay and mill feed, and to hire men to extract and peddle milk, the price of this household necessity was raised on the 1st inst. to \$2.25 per month for a quart to be delivered daily. This raise will make us all feel good and give the milk man a chance to wear diamonds as large as those that adorn the breast of the Napoleons of finance. By an ad elsewhere in this issue it will be seen that Richard Shepard, formerly of Shepard, Dobie & Peterson, has opened a real estate office in the building adjoining the Review, recently occupied by S. C. Norton. Mr. Shepard says of his new office: "It is the oldest real estate office now standing in St. Johns. Guess I will call it the Pioneer building. I would like to have the money that has been made in it. I am the seventh occupant, and have a fine list of bargains to offer."

Ten dollars down and ten cents a day are the terms on which University Park lots are sold. University Park lots are selling right along while others are still, because University Park has the largest payroll on the peninsula, because it has Bull Run water, a university which brings a cultured class, a liquor restriction which excludes saloons. Joshua McDaniels, an Oregon pioneer of 1844, was in St. Johns last Sunday looking for old landmarks. Although past 80 years of age Mr. McDaniels is as spry as a man of 40. He told of many incidents of the early days of Linnton, Portland and St. Johns, and discussed at length his trip across the plains in 1843 with a yoke of cattle. The old pioneer is building a home for himself and wife in Portland, and expects it to be ready for occupancy in time to celebrate their fifty-eighth wedding anniversary in January next. When asked as to what he thought of the future of Oregon, he answered: "There never was a time as good as the present for making money. If I was a younger man I would buy right and left as long as my money held out."

A half dozen attractive new residences will soon be built on Fillmore street. Building permits were taken out during the first part of the week for the erection of the same. Mrs. Charlotte Carlson will build two residences costing \$1200 each. W. F. Stadelman will build three cottages at a cost of \$780 each, and Inkerman Davis will erect a home for himself at an expense of \$1000.

If, by some hook or crook, arrangements could be made to gravel Burlington street north, a whole lot of money and annoyance would be saved to the citizens. On account of the freight sheds and the heavy loads hauled away, the street at its intersection with Jersey, is knee deep in mud. Every wagon passing over it lands additional mud on the already graveled streets. Maybe it would be cheaper to cover the roadway with plank. It would be economy to improve its present condition.
