When complete it will be particularly handsome and convenient. The steam shovel on the railroad has been moved from near Wilamette boulevard to a point near Maegley Junction. A very deep cut, extending from Northern Hill to the river has already been excavated. Miss May Mitchell of Los Angeles, Cal., has been visiting with her grandparents, Mr. and Mrs. Geo. W. Warren of University Park for a couple of weeks. She left on the 8:30 train this morning for Tacoma, Wash. Those contemplating building should consult with M. R. Urban in regard to the hollow concrete building blocks he is manufacturing. He has the facilities for turning out these blocks on short notice and guarantees satisfaction. H. & M. Paints and Sunshine Finishes are still in the lead. Not the cheapest in price, but best in quality, and economical to use. Our stock was never before so complete as at present. These goods absolutely guaranteed. Potter & Goold. Last week while in Coos county W. J. Collins and W. L. Thorn-dyke, both of whom are property owners in St. Johns, transplanted several rhododendrons from the woods there to St. Johns. These are now set out in the yard of the latter named, and one of them is to be placed in the grounds of the city hall when graded. Contractor Crook: "Although the contract calls for the completion of the interior of the city hall within ninety days, or about the first of August, I am going to try to turn it over to the city by July 4. The sooner I get it done the greater the profit, and I shall try and get through as quick as I can. Several changes have been made in the plans, but they will not retard the work." Although workmen are still engaged in clearing up the large tract of gravel above the government moorings on the opposite bank of the Willamette the general public has not been informed as to what is to be built on the ground. A rumor has been current that a large gas plant will be erected, but this is discredited. A person who is familiar with the details of the gas business says it is not likely that a gas plant would be built so far from the source of consumption, and cites the fact that it would cost \$5 or more a foot to extend the large supply main to Portland. To lay this main would require about five miles of pipe. A more desirable and less expensive site would likely be selected if the manufacture of gas was intended.

Downey acts as pall-bearer for an old-time acquaintance—John McLallingham. The funeral is from 459 Eleventh St., North. Late reports from Mrs. Phil Smith are assuring. She is now convalescing and her condition precludes any possibility of relapse. Have you seen the new Lorain Steel range at Potter & Goold's? Nothing like it on the market. Let us show you this range. Potter & Goold. D. S. Southmayd has a ton and a half of 1907 wall paper on hand for you to choose from. Prices and work guaranteed. Call and inspect this stock. W. Elmer Knight has purchased of M. L. Holbrook the property corner of East Burlington and Modoc streets—and will occupy the place at once. There was a large exodus of baseball cranks from St. Johns to Portland on Wednesday—all very anxious to see the mayor push the ball to the plate. F. J. Koerner commenced work yesterday upon the brick building near the postoffice for Petersen & Nocco. It is to be 25x35 feet in size and one story. Building permits to the value of \$18,200 were issued at the city hall during the month of April, and up to this time the record for May totalizes more than \$12,000. This seems a healthy growth. Within four months, if the council will grant the franchise sought, the P. S. T. & T. people will commence the erection of a suitable telephone exchange. And then there will be no kick over the service. Property owners should remember that there is an ordinance prohibiting any accumulations of filth and debris within the city. Both those who dump the stuff and those who own the property are liable to arrest and fine. We are agents for the Wabash screen doors made in the East. Several good styles, and a large stock to select from. Give us a chance to do our part toward protecting you from the flies this summer. Potter & Goold. F. J. This is being constructed on lot 15, block 3, of Jersey street addition, (corner of Jersey and Charleston) and will be one story 50x60. There have been numerous arrests and convictions in municipal court recently for the offence of riding a wheel upon the sidewalk. There is an ordinance forbidding sidewalk riding and no permit can be given to break the law. Wheelmen should bear this in mind. CLOSING OUT ABSOLUTELY Not An Advertising Scheme, But Actually Selling Out. The magnificent stock of the Wagoner Company is now being rapidly decreased in size, and while the owners are not making any money out of the sale the patrons of the store are surely saving a large amount. There is not a householder in this vicinity who can afford to miss these great daily sales—because a purchase means the shutting out of all profit to the handler. It means buying at retail at wholesale prices. It means, too, that no Portland store can touch the bargains shown by the Wagoner Company. Many people are caught by flaming ads in the city dailies, and find out, too late, that high prices rule on decent goods, but here is an opportunity to secure genuine bargains in groceries, dry goods, furniture, tinware, notions—in short, every article handled by their energetic store is to be disposed of at cost—and sometimes at even less than cost. Every day lessens this big stock—the hustling kitten gets the cream: delay not a day, but go to the store and see that your money is saved. The careful householder realizes a bargain when seen, and the big store is full of them. After their stock is closed out buyers will have to purchase at profit-making stores.

ANOTHER INDUSTRY

Northwest Blow Pipe Co. Anticipates Locating Here.

New industrial plants building or seeking locations in our city are getting to be almost every day affairs. The latest one to conclude that St. Johns is just about the right location for their increasing business is the Northwest Blow Pipe Co. of Portland. An option has been taken on ground adjoining the steel ship building operations, and it is the intention of this company to begin construction work as soon as their plans are mature. The proposed new plant will manufacture dust collectors, furnace feeders and galvanized steel piping for exhaust fans on dust producing machinery of all kinds. They will also do general sheet metal work and have a machine and blacksmith shop in connection. When this plant is in full operation it will furnish employment for a large number of employes, and increase the payroll of St. Johns very substantially.
