Local News.

He who by his biz would rise Must either bust or advertise. Watch the label on your paper. If your business is dull, try an ad in the Review. It will bring results if nothing else will.

This is the last week for our house on 2d. This will enable us to give more space for news in the future.

Messrs. W. R. Evans and C. S. McGill of the St. Johns Hardware Co. have moved to St. Johns and are located at the home of Mr. Chipman.

Eugene Wright spent Sunday at Catlin, Wash. He was accompanied by his son, Glenn, who will visit for some time with relatives there.

Mrs. Wheeler and daughter Nona, of Hood River, were in the city last Monday and looked us up. As our little chaperone was away they promise to come again.

Miss Effie McDonald will go to The Dalles via the Bailey Gatzert tomorrow to spend a week's vacation in the capital of old Wasco.

Miss Perkins was good to the widow of the orphan Monday morning by bringing them another splendid treat of delicious cherries. She has the thanks of the entire force.

Miss Grace Stucker visited Miss Zillah Crawford of Vancouver last week and Miss Crawford came home with her Tuesday to spend a week in the city of the Apostles.

Rev. A. E. Leonard has the thanks of the office force for a treat to the finest, most delicious cherries we have tested this season. They were of the Lambert variety and were fine specimens of that kind of cherries.

George Maher came down from Ridgefield, Wash., Saturday and visited his sister, Mrs. George Simmons, returning Tuesday. Mrs. Simmons and little ones went home with her brother for a visit.

The Grace Male Chorus entertained lady friends Wednesday night on Council Crest. The ladies went in advance and had six tables spread with good things, when the gentlemen arrived. Dr. Hepp and wife were of the invited guests. After lunch the doctor made a speech, very complimentary of Professor Wilder and the boys. He was followed by music and readings until 10 o'clock.

Sam Peter said: "I go a fishing." The whole office force went to the same place Saturday morning. We had all kinds of luck and caught a sample of all the different kinds of fish in the creek. All except the orpban, who could not coax a fish to bite and declared he believed they were hoodooed. If you never went fishing you have missed half your life. Come and go with us sometime and we will prove it.

There was an agent of the North Bank road in the city last week looking up the tonnage of the freight for St. Johns. We understand that the O. R. & N. officials were out recently looking up a desirable site for a depot and other matters of interest to their line. We hope they will see their way clear to put in a substantial depot here, for it is badly needed and as they have a track here already, they can put in depot at less expense than anyone else.

Two big fires again last week, one in Portland, where the Abington building was destroyed with about \$575,000 loss. It is thought that the fire was of incendiary origin and it is a puzzle alike to the police and to the property owners. The other fire was in Vancouver, Wash., where the Vancouver lumber mill burned with a loss of about \$30,000. This fire started in the boiler room in some way and had attained too great headway before it was discovered to enable them to extinguish it. The burning of the mill puts 30 men out of employment temporarily. It is expected that the mill will be rebuilt.

Speaking about poultry, there is a "heap" of comfort in having a good supply of nice fat birds to select from instead of having to depend upon the market for your fowls. Besides, there are the fresh eggs every day in the year. If you wish to know how to make poultry pay on a city lot ask Photographer Hart, who has succeeded in bringing up a flock of about 250 and growing all the vegetables he needs for the family on his lot Gault. Then let us send your subscription for the best poultry paper on the coast, the Northwest Poultry News. It is only 50 cents a year and gives you the worth of your money in every issue.

It takes the Chink to mix the language, as this from the Saturday Evening Post will demonstrate: Colonel Fulton G. Berry, a California capitalist, has a small farm near Fresno, Cal., whence vegetables and poultry are sent to him in town for his personal use. A Chinese foreman is in charge of the place. Recently Mr. Terry visited the farm in question and inquired of his Chinese foreman "sing, whole lot of ducks, why no catelem eggs?" "Mistel Bliely," explained Sing, "too many man ducks; sixty-three man duck two cow duck. Man duck him no lay egg."

The last day of July and no rain recorded for the month.

Real estate is still changing hands in a lively manner at Whitwood Court.

Wonder who doctored the city charter after it left the hands of the commission! Don't all speak at once.

Turkey has a Heney, who is demanding that all the corrupt officials be cut off.

Many large strings of fish are daily being taken out of the river and sloughs by the local knights of the rod and line.

An ice cream social will be given by the Evangelical aid society August 15th in the afternoon and evening in the Holbrook block.

Miss Clara Beller, formerly employed as type sticker in this office, is now reveling in the sea breezes and splashing among the breakers near Newport.

The draw on the big bridge across the Willamette, was closed for the first time Friday, and it is expected that trains will be running on construction work this week.

Adam Kaemlein and a gentleman friend chaperoned a party of young ladies at the seashore near Newport for several days last week. They all report a most enjoyable outing.

The Portland Bridge company has already begun work on the Swift contract on the Peninsula east of us and are assembling material for the job. There will soon be a busy place on the big slough.

No move has yet been reported toward establishing a cemetery in St. Johns. This is a matter that should be taken up by the Commercial Club and agitated until some definite action results.

Miss Cole has the gratitude of the scribe for a fine bunch of cherries which she could not name, but which looks like the Kentish and tastes like that fruit. They were very large and beautifully colored and had a very fine flavor and we should judge them to be as Miss Cole suggested, a late Kentish.

J. E. Williams has returned from a three-week sojourn at Tokeland, Wash. He accompanied his charming niece, Misses Nina L. and Grace W. Stephens, of Binghamton, N. Y., who has been visiting at his home in this city, to that place, where they are now the guests of Mr. and Mrs. M. L. Holbrook.

Notice the bulletin boards placed in a couple prominent places in our municipality by the city authorities. If you haven't time to stop and read what is tacked thereto, perhaps you can borrow the matter to take home with you in the evening if you bring it back first thing in the morning. One irreverent cuss says it is a sure sign of a one-horse town when there is a newspaper in the place.

The skating rink has been rejuvenated and embellished by the use of the painter's brush. A string of bottled electricity now adorns the front of the structure. Another window has been added and other improvements made, and now the rink is the favorite amusement resort of the city. The moving pictures and illustrated songs are attracting many thither these pleasant evenings. It is a good place to go to spend a few enjoyable hours.

A pile driver has been actively at work all week driving piling for the Columbia Steel company on their tract on the west side. We understand it is the purpose of the company to erect a dock 700 feet long fronting their proposed steel plant. When this is completed it will permit them to ship all their material for the new works by water. It is claimed this will be the largest steel industry in the Northwest.

E. C. Hurlbert, the real estate hustler and all around good fellow, had an interesting experience with poison oak last week that he will not soon forget. For several days his face resembled a full moon or a large sunflower in full bloom, and his eyes were almost out of sight. His smiling countenance has again, however, resumed somewhere near normal proportions, and he says his friends are beginning to recognize him once more.

W. O. Tucker, chief engineer at the St. Johns Lumber company's mill, met with an unusual and at the same time very painful accident a couple of weeks ago. He was engaged in cutting some grass and weeds with a scythe around his home in this place when a burdock flew up and struck him on the ball of the left eye. That member became so sore and inflamed as a result from its contact with the poisonous weed that an operation became necessary. The injured part of his body is getting along nicely now, however, and he will no doubt be able to use his peeper as usual in a few days.

The ice man has the bulge on the people these days.

There is a beautiful grove of Canadian thistles in bloom on the lot opposite the skating rink and their purple tops attract the attention of all who pass that way. Certainly a thing of beauty is a joy forever.

The unknown person who fired on the steamer containing want-to-be-president Taft, certainly was no sportsman. Had this been the case he would not have used bird shot when aiming for such big game.

Forest fires are raging in different parts of the state. The government is like lots of business men. They pinch to save a dollar on advertising loss ten in trade. The government loses enough through forest fires every year to pay for an efficient forest patrol.

The Owens pool room has decided to abandon the field of action in St. Johns, and accordingly the apparatus was removed from their Jersey street location this week. The many friends of Mr. Owens will be sorry to see him leave.

The Tri-City league has closed business for the season. The flow of the salmon has decreased to such a degree that this course was deemed inadvisable by all concerned. Woodburn led the league, Vancouver second and the Frakes third. The Apostles were somewhere far down the line. It was rather a mean trick closing the season just as St. Johns had begun to play ball. Here's hoping, however, that they will give a better account of themselves next year.

THE BARGAIN COUNTER

For full weight, fresh meat, prompt attention, go to Bitgood & Cole.

You get full weight and first quality at the Central market. Just try it awhile.

The Smith Premier Typewriter

has widened its market until it includes the whole civilized world; has become the typewriter of over 300,000 operators and has, during 1906, broken every previous record of sales, because it has from the beginning met every typewriter need.

THE tri-color feature of the Smith Premier Typewriter is recognized as the greatest improvement in modern typewriter construction—yet in providing it, none of the strong fundamental features, for which the Smith Premier has always been noted, have been sacrificed. Complete literature on request.

Keep Bright and You WILL KEEP BUSY

Electric Light is the magnet that draws trade. The bright store is the "hypnotic eye" of business. People can no more resist the attraction of a brilliant, electrically lighted store than they can resist the clarion call of a brass band.

Is your competitor with the Electrically illuminated show windows, bright interior and sparkling Electric Sign getting an advantage over you? The moth never flutters around the unlighted candle! Up-to-date stores nowadays consider shop-window lighting a necessity, whether they remain open after dark or not. Competition forces modern methods.

A show window brilliantly illuminated with Electric light will make many a sale "the night before." Electric light compels attention, makes easy the examination of your display, shows goods in detail and fabrics in their true colors.

And don't neglect the Electric Sign. It is soliciting "tomorrow's" business every moment it is lighted—burning your name in the public mind. It is a solicitor that never becomes weary—never stops work—costs little.
