Therefore He Resented the Woman's

Attempts at Familiarity. He was riding homeward, comfortably seated and reading his paper. Being a trifle nearsighted, he was applying himself even more closely to his paper than other homegoing passengers. Thus intent in the day's news, he was startled when a woman came up beside him and touched him lightly on the shoulder, at the same time casting a longing eye on his sent.

He is a polite man, and he got up "A woman with that much nerve is entitled to a sent," he muttered to himself, "The idea of a woman deliberately nudging a man out of his seat." Other women standing near by laughed unreservedly. He hid his embarrassment behind his paper, for he felt that his good nature had been Imposed upon and that the laugh was

By and by there was a vacant sent next to the one he had given up to the woman, and he sat down once more. The woman turned and looked at him amusedly. He could feel her gaze, even though be made a bluff at being intensely interested in his paper. Pretty raw, it seemed to him, for a woman deliberately to take the seat of a total stranger and then sit there and laugh at him because he was such a mark.

Then the woman spoke to him. "Aren't you going to talk to me?" she

"Well, of all the"- He stopped right there when he looked around and recognized her. It was his wife!-Cleveland Leader.

#### COOKS' SHOPS.

They Were the Beginnings of the

Modern Restaurant. In primitive times the only places in London where the public could be entertained with food had been the cooks' shops. The famous East Cheap was a great thoroughfare, down which the stalls of the butchers alternated with those of the cooks. You chose a joint at the flesh market, and you carried it next door to be cooked for you by a certain hour. If you wished for wine, you must bring that with you, for the cooks sold no liquor, nlthough they seem to have provided, as time went on, more and more of the natural accompaniments of meat, such as bread, vegetables and pastry.

This habit continued until well into the reign of Elizabeth, and so long as such an inconvenient custom prevalled there could have been no real comfort for any citizen who chose to dine abroad. He must have had as much trouble with porterage and baskets as a country party has today at a picule. But about the time that Shakespeare came up to London a remarkable change took place in the customs of the town, and the practice of public hospitality and entertainment was singularly facilitated.

The nature of this change lay in the sudden development of the tavern and the consequent withdrawal of the cookshop. The worshipful company of pastelars, as the cooks were called, ceased to enjoy the monopoly of providing hot meals.-Edmund@Gosse in Harper's Magazine.

Railroads Are Never Finished. In one respect a railroad is unlike any other project undertaken by man -It is never finished. Like a cucumber vine, says a writer in Popular Mechanics, the instant it ceases to grow it begins to wither. There must be continuous expansion and enlargement. Larger cars require more powerful locomotives, and both in turn call for heavier rails, bigger roundhouses, stronger bridges, longer platforms and sidings, increased safety devices, while the straightening of curves and the leveling of grades come in for their share of attention on even the oldest roads. Little wonder, then, with our railroads consuming nearly one-half of all our manufactured steel and iron and fully one-half of all the lumber made each year, that they are the unfalling barometer of the business activity of the nation.

The Wonders of Science. It was left for the exhibitor of a phonograph in the streets of Utrecht. according to an American traveler, to put the finishing touch to the wonderful invention. There was the sound of a military band in full blast, and then suddenly the tune stopped and "Hait!"

"Who's that interrupting the concert?" flippantly inquired the American, edging close to the operator. "That," said the man, surveying him blandly, "was the voice of Napoleon Bonsparte giving the order at the bat-

rang hoarsely out upon the air.

That Was the Trouble. A Wichita man was fussing because of his aching teeth. "Why don't you go to a dentist?" asked one of his friends.

"Oh, I haven't got the nerve," was the reply. "Never mind that." replied the friend. "The dentist will find the nerve

# A SPIKED MOUNTAIN.

the Remarkable Geological

Freaks of Mexico One of the most remarkable geological frenks in Mexico is a mountain situated on the outskirts of Pachuca which presents the appearance at a distance of being covered with spikes The sides of the mountain are closely studded with stone columns or pallsades. These columns are five to twelve feet long and as large around as an average man's body. It is a remarkable uplift of nature which has the appearance, however, of being the handlwork of human beings. One side of the mountain is almost perpendicufar, and the stone columns protrude from the surface at right angles, forming an impressive picture.

Pachuca is one of the most noted mining districts in Mexico, and it is said by geologists that this remarkable spiked mountain is out of keeping with the remainder of the formation of the mineralized region. The stone is as hard as flint and has withstood the elements for ages. The spikes form natural battlement that makes the mountain appear from a distance like some ancient fort. The mines of the Pachuca district are situated not far from this wonderful freak of nature. but the formation encountered in their respective underground workings is of an entirely different kind from that of the palisade outcropping. -Pachuca (Mexico) Cor. # THE DANGER IN DUST.

Medical Writer Who Says "Let

Sleeping Germs Lie." Did you ever realize what a dangerous thing it is to clean house in the spring? A writer in a London medical journal, the Lancet, insists that spring cleaning has many possibilities for evil if not properly conducted. Dirt and dust are full of disease breeding germs; but, however dangerous these creatures may be when lodged in the woodwork or comfortably settled under the ball carpet, they are much more feroclous, this writer insist, if stirred up and irritated and sent flying through the air. If we can't keep our bouses clean as we go we had better let them stay dirty. This writer's rule is to "let sleeping germs lie."

What a house would look like after forty years of total abstinence from spring cleaning we leave to our women readers to judge. Yet we venture the assertion that there is one creature who would find the situation entirely satisactory. It dislikes the annual cleaning ceremony, it hates to eat cold suppers off the kitchen table, and beat ing carpets is to it an abomination. It will doubtless make capital out of the Englishman's warning against the perils of housecleaning.

Book of the Dead. The Book of the Dead is a most remarkable literary relic of ancient Egypt, of uncertain date and origin,

but well known before the kings of the first dynasty. Probably the col lected work of many minds in different ages, it was regarded as the work of the god Thoth and therefore of divine authority, dealing mainly with the dead and their future state. Some of its texts, prayers, bymns and ritua were used by the predynastic priests. and parts of the book are said to belong to a period fifty centuries before the Christian era. Copies of it were placed in the tombs, and texts from it were inscribed on coffins to preserve the dead from dangers and to direct them to the boat of Ra on their way to the hall of Osiris, which was the goal desired. The oldest existing papyrus copy of the book was written for "Nu, the son of the overseer of the house of the overseer of the seal Amenherep and of the lady of the house Senseneb" and probably belongs to the early part of the eighteenth dynasty.

A Fateful Breach of Etiquette Under the third empire in France Sainte-Beuve brought disgrace upon himself because at breakfast at the

Tuiteries he carelessly opened his napkin and placed it over his two knees. To this he added the crime of cutting his egg in two at the middle. Court etiquette prescribed that the balf folded napkin should lie on the left knee and the top of the egg was to be merely broken with the edge of the spoon and drained with the tip of the spoon. For his fallings in these respects Sainte-Beuve's name was stricken off the imperial visiting list. - London Chronicle

Ready For Use.

As usual, the children were very hungry and were walting patiently for father to fill the plates and pass them around. Father, however, was busily engaged to conversation and missed little Marion. After every one had begun eating the child grew desperate and interrupted his father:

"Say, papa, I've an awful good appetite today if you'll only give me s chance to use it."-Woman's Home Companion.

MOON WAS UNDER A CLOUD.

An Incident of the Theater In the Earlier Days.

Early in the season of 1856-7. said J. M. Barron, the veteran actor, we were in Petersburg, Va., at old Phoenix ball. The business was such that nightly long rows of alle green seats could be seen from the stage.

In those good old times the utility week. The leading people received due in the utility contingent a Ute named Moon, and a bright Moon he was, but he was so lazy his shadow would not follow him. He was often late. The star was Charles Couldock, and those old timers who can yet sit up on an even keel may remember that C. C. could do cuss poetry in four colors

his contract. We were rehearsing "The Willow Copse," and Moon's cue came, but no Moon shone up. The call boy started with a shout, "Mr. Moon!"

The prompter called, "Mr. Moon!" Three Utes away up stage joined in "Mr. Moon, this is you; stage is wait

Couldock began to pace from tormenter doors to L. 4 E. No Moon. Finally Couldock bawled Where is that Moon-that utility idlot? Always late and doesn't know his cues when he hears them."

No Moon yet. It appeared that Mistress Moon had presented the old man with a fine daughter-a new Moon. The father Moon went out to celebrate with the boys and later on was wheelbarrowed home a full Moon.-New York Telegraph.

# PLAYING THE PIANO.

Rubinstein's Way as a Teacher With

His Pupils. "Once I played a Liszt rhapsod; pretty badly. After a few moments be said, 'The way you played this piece would be all right for auntie or mamma.' Then, rising and coming toward me, he would say, 'Now let us see how we play such things.' Then I would begin all over again, but hardly had I played a few measures when he would interrupt and say:

"'Did you start? I thought I hadn't beard right." "'Yes, master, I certainly did.'

would reply. "'Oh.' he would say vaguely, 'I did not notice." "'How do you mean?' I would ask.

"'I mean this,' he would answer: Before your flugers touch the keys you must begin the piece mentally-that s, you must have settled in your mind the tempo, the manner of touch and above all, the attack of the first notes before your actual playing begins.' "On another occasion I asked him for the fingering of a rather complex

"'Play it with your nose,' he replied, 'but make it sound well.' "Once Rubinstein said:

"'Do you know why plane playing is so difficult? Because it is prone to be either affected or else afflicted with mannerisms, and when these two pitfails are luckily avoided then it is liable to be-dry! The truth lies between those three mischiefs."-"Hof-

Sweets Are Great Baby Savers The young, unspoiled human animal has a liking for sugar just as it has for sunlight, for fresh air, for play, for paddling in the surf and plunging in the stream or for food when it is hungry and sleep when it is tired and, subject, of course, to reasonable limitations, as wholesome as any of the others. This is precisely what our specialists in children's diseases and broad minded family physicians have been urging for decades past, and it would be safe to say that, next to the banishment of starchy foods, gruels and paps from the nursery and the substitution of pure, sweet milk, few things have done more to increase the vigor and happiness of modern children and to cut down our disgraceful infant mortality than the free and intelligent use in the nursery of sweet fruits, preserves, sugar, taffy and but terscotch.-Woods Hutchinson in Suc-

Getting Down to Facts.
