

Mayor Seidel's Message to the Milwaukee City Council.

The eyes of thousands of stricken citizens are today directed toward our Milwaukee and millions of good wishes and "God bless you's" are carried on the four winds to the western shore of Lake Michigan. I cannot too strongly impress upon you the sacredness of the trust placed upon you. All your efforts must be bent toward the execution of the task before you. Many obstacles will be placed in your way. Your successes may not always follow your first attempts. But your resolute pluck and determined perseverance must in the end conquer the difficulties that face you.

It has been your good fortune to be placed in a dominant position and you should follow your purpose with an untiring will. At all times the heads of the various departments should be vigilant and every worker should understand that in doing his work to the utmost of his ability he is contributing to the efficiency of the city government.

In your policy, the promises contained in our platform should have a prominent part. Such measures as can be carried out under the provisions of our present charters should be taken up at once. Where the charter interferes, proper bills should at once be drafted to be presented to the next legislature.

Before all things home rule, the right of self government should be secured for the city of Milwaukee. A strong legislative committee should be appointed to argue these bills before the committees of the legislature. It might be wise to reinforce this committee by a delegation of public minded citizens whenever results can thereby be achieved.

The workers of our city are its most valuable asset. Your attention should be directed to the passage of such measures as will promote the well being of this class of citizens, safeguard health, check any tendency to encroach upon such few rights as the workers still enjoy, and wherever possible extend for them the opportunities of life.

"In this direction a number of steps can be taken. The administration should constantly watch over the conditions prevailing in factories, workshops and places of employment, with regard to sanitation. There should be at all times a full and hearty co-operation with state factory inspectors in the enforcement of measures providing for industrial hygiene.

"Contracts to be let by the city are awarded to the lowest bidder. This does not preclude the right of the city as a corporation to demand compliance with certain specifications. Thus, the quality and treatment of materials may be specified to insure economy. It is the height of absurdity to contend that this should not hold good with regard to labor. The contention that the city can not as an economic precaution specify the treatment of labor, is a violation of the right of free contract, a right enjoyed by corporations and individual employers.

"Therefore, in contracts to be let by the city, the specifications should provide for hours of labor that are not exhausting, that leave a margin of time for rest and development. Such specifications should also provide for sufficiency of light and ventilation; they should prohibit child labor and properly protect woman labor, and prevent the imposition upon workers of degrading conditions.

"The city has police powers enabling it to enforce the ordinance which makes the carrying of concealed weapons unlawful. This ordinance should be strictly enforced. Our population is law abiding and well able to handle its own affairs. The practice of bringing armed hirelings into the city of Milwaukee to mingle with a population that is peace loving, has cost loss of life and should be stopped. Our difficulties should be settled by appeals to reason.

"Proper action looking toward the establishment of a bureau of municipal research should be immediately taken. An expert should be called in to advise with you on this subject. The first object of this bureau should be to make a municipal survey, to furnish accurate and adequate knowledge of social, industrial and economic conditions leading to specific and practicable plans for city betterment.

"Thus a complete cost keeping system for every municipal department should be established, distinct from an accounting system. Such a system would enable anyone to discover leakages and losses, whenever such existed.

"The survey should extend to other subjects, your action being directed to such as are of immediate importance and calling for first attention. This will enable you in a short time to place the finances of the city on a sound and sane basis, fix a more nearly equitable basis of taxation and arrive a basic cost units that will be of great service. (To be continued next week.)

Note—The first business transacted by the council immediately following the Mayor's address, was the passage of a resolution abolishing the Board of Public Works and providing for a commissioner.

Right Here at the BALL of the Foot

is where most of the "pinch" comes when buying a new pair of shoes. You complain about it when trying on the ordinary shoes and the salesman says "I'll stretch it." Whenever he has to do that, look out—in a few weeks you'll find your feet running over the edges of the soles and the uppers. That stretching to the limit of the strength of the shoe will not be necessary.

The Bradley Shoe Will Not "Pinch" Your Feet

Every pair is built with an allowance of leather at the ball of the foot which permits the foot to rest comfortably in the new shoe the first time you put it on. The linings in the Bradley Shoe will not wrinkle after a little wear, causing discomfort so common. They are cut to conform to the upper. This perfect fit even gives additional wear as it takes a great deal of strain off the leather.

Bradley Shoes for Men, \$3.50—\$4.00

represent the highest standard of material and workmanship—sixty-six years of continuous application to the making of a shoe that will give perfect satisfaction. We make less profit on a Bradley Shoe, but we'll be glad to sell you a pair, for once a wearer of these honest, well-made shoes, it will be hard to resist buying again, and the increased volume means not only profit but public confidence.

Bradley's are made by the Bradley & Metcalf Co., who have been makers of good shoes for 66 years. We also have other styles of their make for men, women and children.
