(Ki-ro-prak-tik)

Comparatively a new science by which the cause of disease is determined and the art of removing the same by the hands without medicine or surgery. The spinal column is the main shaft or support of the human body, and is composed of 26 articular joints or movable bones (Vertebrae) through which the spinal cord passes, sending out from between each of these Vertebrae nerve filaments to the different organs, muscle and tissue of the body How vital these nerves to our being Destroying those of the finger, arm or leg, or any other member of our body, and that member is also destroyed; or impinge or otherwise injure a nerve of any portion of the body, and trouble begins. Think how often accidents happen, even from the moment of birth to that of old age, such as falls, sprains, poisons, bad colds, etc., that so often move Vertebrae out of place, thus impingeing or otherwise interfering with the nerves passing from between them, which may cause the Asthma, Infant Paralysis, Heart, Kidney, Stomach and Liver and all other troubles, owing to what organ, tissue or member that nerve supplies. There is no disease but that will yield more readily to this method of cure than to the socalled best medicine in this great world of ours. Come in and let us demonstrate, if you are in any way afflicted, and especially if you have failed to procure relief elsewhere. Consultation will cost you nothing. Chiropractic never injures any one, never fails to benefit, and seldom fails to cure even the most stubborn
