THE ST. JOHNS REVIEW

BY A. W. MARKLE

Published Every Friday
At 117 West Burlington Street.
THE REVIEW is entered at post office in Saint Johns, Oregon, as mail matter of the second class under the Act of Congress of March 3, 1879.
Official Newspaper of the City of St. Johns.
Advertising rates, \$1.00 per inch per month.
Subscription price \$1.00 per year.

It should afford the people of St. Johns the keenest pleasure and gratification to know that this city will have a live wire Commercial club, one that will reflect credit upon St. Johns and become a potent factor in its upbuilding and further development. There has long been a crying need for such an organization. The business interests heretofore have not amalgamated, have held aloof from all previous attempts of organization. Now a wonderful change has taken place. The merchants, the city officials, the professional men, the manufacturers and the alert citizens have banded themselves together with the object in view of making the St. Johns club a power that will be felt all over the Pacific Northwest. Evidence is at hand that funds necessary to make it a splendid success will be forthcoming. M. G. Nease, who has ever been a most pronounced booster for St. Johns and the Peninsula, is entitled to the credit of lighting the first match. A spark set a fire among the right material was all that was needed. The test followed as a matter of course. Since the movement has been properly launched, all can help. Even the most abject specimen of humanity in St. Johns can do his share. A good word, hopeful and sincere, a little confidence in our fellow men, absence of dissention, petty bickering, knocking and disparaging remarks all help. Boost, never knock. If a kind word about the city cannot be spoken, it is best to keep silent. Attend the mass meeting when it is called. If you are unable to help financially, your moral support will be highly appreciated. St. Johns can be made to prosper as it never has done before with persistent, intelligent effort. Let us get together, men of St. Johns, and shoulder to shoulder and by united purpose place this city among the foremost on the Pacific coast. It can be done. No other city in the United States has a better chance. It is up to all of us.

It is beginning to dawn, in fact has dawned upon the people of St. Johns, that for some time the county commissioners have been giving this city a rather snide deal. Thousands of dollars go every year into the county coffers from this city, and so far we have received but mighty little in return. Of course we shall get the free ferry, but it is through no good offices of the county commissioners that it is coming about. On the contrary they jumped at the first technicality to present itself to block the ferry. Not so far back in the dim and dusky past a number of our citizens reached down in their pockets and paid for a right of way for a county road through the north end of the Peninsula. The proposed roadway was a most beautiful one, and opened up an unusually interesting portion of the lower peninsula. The county authorities gave assurance that if the right of way was acquired they would construct the roadway and place it in first class condition. The right of way was purchased by public subscription, and those most interested have patiently awaited the building of the roadway. That was several years ago, and today the people are still waiting. Nothing has been done. Why? Only the commissioners can tell. So confident were the commissioners that the free ferry would be blocked that it is now asserted that the funds which should have been reserved for its construction were used for other purposes. Isn't it about time that our people should give more attention to whom are elected to fill the county offices? Wouldn't it be wise to elect men who show at least some regard for the lower peninsula and its wants? We have about 1000 votes in St. Johns. Let us remember when election day arrives.

The McNamara trial at Los Angeles is progressing in a most tedious manner. A satisfactory jury seems hard to obtain. Any excuse and every excuse is enough to keep a jurymen from serving. It is passing strange that the defense must spend a million dollars, as is said to be the case, in order to secure a fair trial in California. If this be necessary, what chance would a poor man have without the aid of a strong organization? To a casual observer it must occur that such an immense sum is more likely to be spent to defeat justice than to obtain it. This same observer must also realize that the trial may be more or less a farce. It would require extraordinarily brave and fearless men to render a verdict of guilty, whatever the evidence. Vis-

Stories of Success

PETER COOPER

Peter Cooper was America's first great business man and always in business he made the Golden Rule pay. The city of New York owes a deep debt of gratitude to this good man, for he gave 20 years of his life to planning and developing the Cooper Institute, a great free university designed to give poor boys an education. Peter Cooper's childhood was one of toil and endeavor. Just one year did he go to school, just one year in all his life and then for only half a day at a time. The Cooper Institute today, on the spot where the grocery store of its founder once stood, is the most complete free school of its kind in America. The nest-egg of his afterwards great fortune was the money saved in boyhood. It is remarkable how savings added to from time to time will accumulate. Even Peter Cooper had to make a start. Just one dollar will open a savings account for you in this bank. Isn't today a good time to begin?

ions of bombs and "gas-pipe" explosions would no doubt hover very near in the days to come. And it seems that bravery and heroism are not among the requisites expected of a jurymen in this celebrated case.

Health Officer Wheeler is forcing employees of the Portland Railway, Light & Power Co. to be vaccinated. Yet this is sometimes called a free country. As a result of this autocratic order more deaths and illness is likely to result from vaccination than from smallpox. The world do move--backwards some times.

An Eastern correspondent wants to know what we do in Oregon when it rains. So far we have found about the only thing to do is to let it rain.

Wolcott (the rent man) 130 11th street, Portland, is the man to see for real estate or mercantile deals. 464f.

To take your order for that stove you need.

Our line is complete. See us before you buy.

We are taking orders for Fireless Cookers. Our second shipment will arrive in the course of a week. Step in and we will explain how they save 75 per cent in fuel alone.

ST. JOHNS HARDWARE COMPANY

BULLETIN NO. 3

To Open an Account

The first step to be taken preliminary to opening a bank account is to call at the Bank and make yourself known to some of the officials. Your account will be welcome for we appreciate and solicit accounts of reputable firms and individuals.

The officer who receives your deposit will issue a pass book, the credit entries are always made by one in authority to do so, and will be your receipt for the various sums deposited.

This book should be left at the bank monthly to be balanced, and will be returned on application a day or two later with your cancelled checks. You should examine same at once and report any possible errors.

At the time of opening an account, your signature will be taken on a card kept for that purpose, and all subsequent signatures and endorsements by you should be written precisely the same to avoid confusion. This is very important, as otherwise it is almost impossible for the Bank to determine a genuine signature or a forged one.

You Can't Lose-- Alveolar Dentistry

counterparts of the work, let you see for yourself what it is. There are 12 Alveolar Dental Co. offices in the West. About 80,000 people in the United States are wearing Alveolar teeth. About 50,000 were supplied by the Alveolar Dental Co. About 2000 people of this city and state were equipped in this office. 99 per cent of these, if not all, will tell you that they are delighted and that it's the best investment that they ever made, if asked. We will gladly refer you to as many as you care to see.

Alveolar Teeth. Where Bridgework is impossible.

If only your front teeth are left, say three or four or more, we can replace all of those that have been lost on both sides clear back with perfect Alveolar teeth, whilst bridgework would be impossible even if you have eight or ten front teeth to tie to.

If you have only two back teeth on each side, say molars, we can supply all the front teeth that are missing with beautiful, serviceable, lifelike Alveolar teeth. This could not possibly be done by the bridge route. And where bridgework is possible, there is no comparison between the two. A very large percentage of our work is taking out bridgework put in by supposedly high-class dentists and replacing it with the beautiful and artistic Alveolar teeth. And unlike bridgework in another respect, it is practically painless. No boring or cutting into the gums, nothing to be dreaded. Now then prices being equal, which would you choose?

Curing Pyorrhea (loose teeth) a disease given up by other dentists as incurable is another of our specialties. We cure it absolutely. It's a boastful statement to make, but we can do anything that is possible in dentistry, and what we do is always of the very highest class. Our booklets, Alveolar Dentistry, are free. Write for one if you cannot call. We have samples of our work to show at all times.
