

Pupils, Attention

To the first student bringing in the correct arithmetical solution of the following problem will be given 100 worth of school supplies—your own selection. Answer to problem and name of winner published next week. These problems will continue for some time.—J. M. Shaw, groceries, school supplies, bakery goods, fruits, nuts, etc., 802 North Ivanhoe:

A number of people were guessing at the height of a flagpole. Mr. Skeehink came out with a yard stick and measured the length of the shadow cast by the pole and found it to be 27 feet. He then held the yard stick upright and found its shadow to be 14 inches long. A moment's figuring and he was able to tell the height of the pole above ground. How high was it?

Answer to last week's problem: Longitude 60 degrees east, latitude 23 1/2 degrees south. Winner, Etta Dixon.

The answer to the hen problem should have read 92-3 not 93, a typographical error.
