

## The Bonville System

(Continued from first page)

has ever known?  
Q. Why has this system never been used before?  
A. Why did not Caesar travel in an automobile?  
Q. What is the "Bonville System?"

A. A Square Deal to All. It is a middle ground whereon capital and labor may co-operate with results satisfactory to all.

A. Why is the Bonville System the greatest move before the civilized world?

A. The world, since our first historical knowledge, has been nursing a sick and crippled financial and commercial system. Many have tried to cure it. Some have been the means of applying remedies of a beneficial nature, but all have failed to make the cure. Probably one of the most direct reasons for this failure lies in the fact that our benefactors in the past did not sufficiently realize the immense amount of active forces needed, in order to effect this cure. It is a well known fact, that relief can be obtained through application of that root of mathematics that the average third grade scholar has knowledge of, in his limited way, and that is: that the more forcible numbers and powers are the direct results of combinations. The larger the number the greater the force it represents. The same can be applied to our domestic and national conditions. The larger a combination of men the greater the power, force, and energy they represent. Hence, nations acting against nations have more weight than state acting against nation or county against state, or individual against county, etc.

The Bonville is a simple, easy, and direct cure for existing deficiencies that are so ever present and oppressive to all. It will accomplish that which the wise men of the earth have secretly yearned and striven for, viz: The creation of a "Golden Age," wherein all men irrespective of state or birth, will have the same financial and commercial footing, will reap equal revenue from like investments,—will, in fact, have as its basis those essentials which are the direct consistency of a square deal, because it protects, insures, and gives the investor what his money earns, stops wealth from centering in a few people's hands, stops stock gambling, spells death to fake promoters and fake labor leaders, and encourages the small investor.

Q. Why have ninety-nine year contracts?

A. It is the longest legal contract in general use at the present time.

Q. How will it affect those parties who do not invest?

A. It will stop panics and reduce the cost of high living, and develop better social conditions for all.

Q. Will this system be adopted universally?

A. Yes. Because it is just, and the world is demanding justice.

Q. What is meant when it is said that this system will revolutionize the business world?

A. That in time practically all business organizations will be obliged to concede to the wishes of the people and organize under this system. The people, who are the direct sustainers of many of these organizations under the old system, will, when the same are re-organized under the new, have the privilege of sharing in the profits derived therefrom.
