The contention of the anti-suffragists that if women are enfranchised, it will be only the depraved women who will vote loses all force in face of the fact that almost 300,000 women voted at the last election in Denver, and of these only 400 could be identified with any bad element. In no nation, city or state where have been enfranchised, has the vote of the disreputable women even remotely approached that of the women of good repute.

It has been fully demonstrated time and again that the council chamber of the city hall is woefully lacking in seating capacity. A number of public meetings have been held therein at various times lately, and as general rule a number had to stand up. There seems to really no necessity for this state of affairs. The cost of seating the hall properly would be but slight, and the comfort and convenience great. Let the buildings and grounds committee get busy.

Tillamook County, under the lead of its chief commercial club, hopes to establish a demonstration farm, devoted exclusively to dairying. Every farmer would thus have at hand where he could learn the most modern methods and this would improve the output throughout the country. If a small gain should be made for each cow, the aggregate benefit would be very large. A county league will probably be formed to manage the demonstration farm.
