First prize, one dozen photos, Hoes, value \$6. Second prize,

A PHOTOGRAPH of U. S. Geological Survey Map, Portland Quadrangle; that part illustrating with additions, ST. JOHNS and part of PORTLAND, ORE.
A great city is growing at the fork of two great rivers, one hundred and ten miles from the Pacific Ocean, at the head of deep sea navigation on the Columbia River. Note the Columbia River and tributaries, like a great fallen tree on the map of three Western States. The water shed of the Inland Empire breaks through the Cascade Mountains to the sea. Everything floats and rolls down water grade to meet the deep sea ships at ST. JOHNS. St. Johns is destined to be the commercial and manufacturing part of Greater Portland. The north jetty will insure forty feet of water on the Columbia River bar; then ships can be moved for 3 cents per net ton and from St. Johns and Pacific Ocean.

pair of shoes, W. Jower, value \$3.50.

Class E—Vase of 20 stems, lavender.
First prize, \$5 in trade, St. Johns Pharmacy. Second, \$2.50 in trade, John Noce.

Class F—Vase of 20 stems, pink.

Stroud, Dr. Scott, Roy Wilcox, Mr. Wray, St. Johns Water Co., C. H. Boyd.

How is Your Title?

Have your abstracts made, continued or examined at the Peninsula Title, Abstract and Realty Co. Accurate work. Reasonable fees. H. Henderson, manager, 208 North Jersey, McDonald building.

Farm For Sale—40 acre farm, 25 acres cleared, buildings, all in hay; 40 acre farm, 10 acres cleared, million feet saw timber, 5 miles from Sifton car line; part cash, easy terms.—P. Chantler, R. F. D. No. 1, Brush Prairie, Wash. Phone Tabor 3425.

St. Johns, City of Destiny

It has been the history of the founding and building of every great city that those who laid the foundation for future greatness sought primarily a location affording natural means of transportation; the greatest cities of the world today stand upon the banks of the navigable rivers or are built by the harbors that afford anchorage for the deepest draft vessels that go down to the seas.

The great transcontinental and trunk railway systems seek these places as their terminals, for after all it is the ocean going craft that make possible the construction of the great railway systems. What, then, are the possibilities of a city that is built upon one of the greatest inland waterways of the United States and at the same time affords rail transportation over the lines of two of the greatest railway systems of the world? Such a city is St. Johns, the key to the transportation on the Columbia and Willamette rivers. Adjoining St. Johns lies the great city of Portland. Her future greatness depends upon her water transportation facilities. St. Johns is nearer the mouth of the Columbia and the confluence of that mighty stream and the Willamette. Almost within her city limits is the entire point of the peninsula, whose point is washed by the waves of both the Columbia and the Willamette. St. Johns has a great water frontage, and the day is not far distant when this entire water front will be almost a solid line of docks and industrial plants. Great transportation experts have declared emphatically that the peninsula is eventually to become the New York of the West.

Differing from other cities in the Northwest, St. Johns is not dependent on back country for her prosperity; it does not depend on the seasons; droughts have no effect on her; crop failures do not decrease her bank deposits. The output of her industries are shipped to every section of the United States and to every important port of the world.

St. Johns is essentially an industrial and manufacturing center and it is to these plants that she owes her greatness. Their large payrolls go to swell the accounts of her merchants, to increase her taxable property, and to aid in the general development of the city.

Controlled by the wonderful Western variety of progress, the inhabitants of St. Johns have surrounded themselves with many institutions that are the product of modern times. A fine city hall, built on the old colonial style of architecture, graces one of the prominent locations of the city, providing a handsome home for the municipal officers and shelter for the performance of all civic functions. While this is essentially and primarily a manufacturing and industrial center, the call of modern times for education of the younger generation has not in any wise been disregarded. Today St. Johns points with pardonable pride to one of the very finest high school buildings in the entire state, which was erected at a cost of \$40,000, while three grammar or graded and a Catholic school are afforded those of the children who have not as yet advanced to the high school curriculum.

Study the map adjoining carefully. It displays the wonderful natural advantages of St. Johns far better than words can. It is a veritable city of destiny. Nothing is lacking to make it eventually the greatest city on the Pacific Coast. It is steadily growing year by year, not in a booming manner, but in a healthful manner. The numerous civic improvements that have taken place within its borders during the past few years proclaim the public spiritedness of its citizens. It has emerged from a small village to its present admirable proportions in ten short years.
