After a few business matters had been attended to, those present enjoyed music given by various members of the class, after which dainty refreshments were served.  At a meeting of the W. C. T. U., held in the Library Monday afternoon at 2:30, the following officers were elected: President, Mrs. J. C. Scott; vice president, Mrs. Ina Canright; recording secretary, Mrs. Carl Nelson; corresponding secretary, Mrs. Beltinger; treasurer, Mrs. Lydia Tallman. Delegates elected to the county convention to be held in Portland about the middle of September were Mrs. Carl Nelson, Mrs. Minnie DeLyser, Mrs. Hollenbeck and Mrs. George Jeffcott. Ten dollars to the county and twenty-five dollars to the state were pledged for the state wide prohibition campaign. Mrs. Scott has been president and Mrs. Tallman secretary ever since the W. C. T. U. was organized here in 1905, with the exception of the first three months. Mrs. A. W. Markle made a few remarks concerning the Better Babies contest and enlisted the aid of the Mothers' club, by vote of the meeting.

 Great Britain ought to be proud of Canada. She doesn't cause any trouble, and is good to her mother.  
 At times it seems that the ministering angels of the Red Cross are the only persons connected with war who keep in touch with God.  
 An automobile dealer will sell a man a machine that just simply can't break down, and then try to sell him a kit of repair tools, with no more strain on his conscience than the drawbar pull of a trained flea.  
 A plant for distilling oil of peppermint is being constructed near Springfield. O. H. Todd, and associates, of Eugene, have planted 40 acres to peppermint and will work up the product in their own factory. If the yield of oil meets their expectations, the 40 acres should give gross returns of about \$6,000. The industry is likely to become important in Lane County.  
 Dr. Mary MacLachlin of Portland, formerly of St. Johns, was in London when war was declared, according to word received in this city on a postal card from Dr. MacLachlin yesterday, says the Oregonian. The postal said she was in London, where excitement was running high and where Americans were frantically trying to book transportation to this country. She said nothing about her own success in securing the same. She is with her mother and sister and was expected back the middle of September.  
 Oregon City firemen, says a dispatch in the Telegram, are now settling down to business for the honors in the tournament to be held in St. Johns on Labor Day and, according to the announcement of Assistant Chief Noble, practices will be held every night from now to the day. About 20 members of the local companies turned out to the practice Monday night and went through the first steps in organizing the teams. Oregon City has always stood well up in the annual event and nothing short of first place will content the Clackamas county representatives this year, says the firemen.  
 Of the 89,313 shareholders of the Pennsylvania road 49 per cent are women. The increase in the number of shareholders of the railways in the United States since 1904 has been 115 per cent. This shows the widespread degree of interest that is taken by the people themselves in the railways of the country. It is also an argument for government generosity in dealing with the railways in which so many of the people have invested their savings. The Canadian Pacific has something like 65,000 shareholders scattered over the world.  
 A panoramic reproduction of the Grand Canyon of Arizona is being built at the Panama Exposition at a cost of over \$30,000; over fifty thousand square yards of linen canvas, imported from Scotland, are being used for the set pieces. Visitors in this concession will view the panoramas from observation cars, moved by electricity on an elevated trestle, seemingly along the rim of the canyon. The observer will be enabled to see eight of the most distinctive points of the canyon and the ride will last over half an hour, including, apparently, a journey of more than one hundred miles of the great gorge. Every resource of modern science is employed in the work of reproduction.  
 Clabe F. Brooks died at the Good Samaritan hospital, Portland, Thursday afternoon of last week, following an operation for cancer of the face. Deceased was aged about 65 years. He had worked with his brother, the late J. T. Brooks, in the shoe repairing business here for a few months several years ago. For a number of years he had lived the life of a cowboy life in the middle west, and had gained quite a reputation as a broncho buster. Lately he had been residing in Newberg. He is survived by one brother and three sisters, all residing in the state of Nebraska. The cancer started from a small pimple at the side of his mouth, and gradually spread, finally covering the greater portion of his face. The funeral took place Saturday afternoon at 2 o'clock; interment in Mt. Scott cemetery.

 In spite of war, high prices of living and low water, G. L. Perrine is busily engaged in placing his famous Vacuum Fireplaces in various parts of Oregon and Washington. It keeps him on the jump all the while, and scarcely gives him time to keep posted on the war news. His fireplace is surely a winner.  
 War developments in Europe are progressing. The armies are getting closer together all the while, and the greatest battles the world has known are imminent. Severe fighting at different points have been in progress all week, but the worst is yet to come. The reports received are meagre and unsatisfactory from the seat of war, and it is likely that many important engagements have happened that have not yet been made public.  
 It is up to a bunch of "live ones" from the Vancouver Commercial club to attend a meeting of the St. Johns Commercial club next Tuesday evening, and then there show cause why the people of St. Johns and vicinity should attend the coming Columbia River Interstate fair in preference to going the Pendleton Roundup. The letter received by the local club states that the St. Johns men are open to conviction, but that they will first have to be shown how and why they will have a better time here than at the other place. A committee of "said live ones" will be named by President Kinney to attend this meeting. —Journal.  
 Two Japanese sailors jumped from a Japanese vessel Monday night near the midnight hour as it was passing St. Johns on its voyage outward, and attempted to swim to shore. The older of the two, being the best swimmer, carried the clothes on his back. The younger one, aged about 20 years, was discovered by Rupert Stevens at the St. Johns Lumber Company's mills early Tuesday morning. He was unable to speak English. The Japanese consul at Portland was notified by the local police, and he came to St. Johns. The lad told the consul of the two swimming from the vessel, but was unable to tell what had become of his companion. Whether he was drowned in making the shore, or whether he landed at another point and made away in the darkness without finding his fellow countryman is still unknown.

**For a Merchant Marine**  
 Comprehensive plans were mapped out by the Administration yesterday for building up the American merchant marine with government money for the immediate purpose of transporting the products of the country to the warring nations of Europe and to South and Central America. President Wilson, in consultation with Democratic leaders of the Senate and House, approved a project contemplating the expenditure of about \$25,000,000 for the purchase of ocean going vessels, to be operated under the direction of a government shipping board in carrying on the foreign trade of the United States.
